## INTRODUCTION

Introduced by the Agency for Healthcare Research and Quality (AHRQ) in the mid-1990s, the Consumer Assessment of Healthcare Providers and Systems (CAHPS) program encompasses the full range of standardized surveys that ask consumers and patients to report on and evaluate their experiences with health care. These surveys cover topics that are important to consumers, such as accessibility of services and provider communication skills.

The National Committee for Quality Assurance (NCQA) uses the Health Plan CAHPS survey in its Health Plan Accreditation Program as part of the Healthcare Effectiveness Data and Information Set (HEDIS). HEDIS measures health plan performance on important dimensions of care and service and is designed to provide purchasers and consumers with the information they need to reliably compare the performance of health care plans. The Health Plan CAHPS survey represents the patient (member) experience component of the HEDIS measurement set. The survey measures patient experience of care and gives a general indication of how well the health plan meets members' expectations. Parents or caretakers of surveyed members are asked to rate various aspects of the health plan based on their experience with the plan during the previous six months.

## EXECUTIVE SUMMARY

In 2020, Aetna Better Health contracted with the Center for the Study of Services (CSS), a National Committee for Quality Assurance (NCQA)-certified survey vendor, to administer the Consumer Assessment of Healthcare Providers and Systems (CAHPS®) 5.1H Child Medicaid with CCC Measure Survey. The purpose of the survey is to assess members' experience with their health plan and health care. The overall goal of the survey is to provide actionable performance feedback to help improve member experience.

CSS administered the Child Medicaid with CCC Measure version of the CAHPS Health Plan Survey on behalf of Aetna Better Health of Louisiana, hereafter referred to as ABH of LA, between February 17 and May 13, 2021.

The final survey sample for ABH of LA included 3,952 members (2,112 from the general population and 1,840 from the CCC population). During the survey fielding period, 380 general population sample members completed the survey. After final survey eligibility criteria were applied, the resulting NCQA response rate was 18.74 percent.

This was the second survey administration cycle taking place during the COVID-19 pandemic. In response to significant changes in consumer behavior during the pandemic and the accompanying shift in care delivery toward telemedicine, NCQA expanded the CAHPS questionnaires to include any care received “in person, by phone, or by video.” While NCQA has not provided trending guidelines for the revised questionnaires, in June of 2020 NCQA recommended against using its 2020 CAHPS national benchmarks for improvement scoring and year-over-year trending<sup>1</sup>. Additionally, NCQA's Health Plan Ratings (HPR) methodology calls for CAHPS scores to be compared to prior-year benchmarks. In a departure from this standard methodology, NCQA decided to base its 2021 Health Plan Ratings (HPR) on the current-year (2021) Quality Compass® national benchmarks, which will not be available until September 2021. **In this context, your organization's 2021 survey results and any comparisons to prior-year performance benchmarks should be interpreted with caution.**

This Executive Summary focuses on key CAHPS performance metrics, including year-over-year changes in results, comparisons to relevant national benchmarks, and estimated Health Plan Ratings<sup>2</sup>. Also identified are top organizational priorities for quality improvement based on CSS's *Key Driver Analysis*.

The measures highlighted in this section are limited to the general Child Medicaid population only. CCC measure results are reported in the sections that follow. They are based on 277 completed surveys from both the general and supplemental CCC samples that met NCQA's criteria for inclusion in the CCC measure set, based on survey responses.

---

<sup>1</sup> For more information, see [www.ncqa.org/covid/](http://www.ncqa.org/covid/)

<sup>2</sup> CSS calculated HPR (star) ratings based on the 2020 NCQA Quality Compass National Percentiles (the most recent dataset available at the time of this report's publication). They should only be used as **estimates** of your organization's official HPR scores. NCQA has scheduled a private release of final ratings to individual plans in early September, with a final public release (at [www.ncqa.org](http://www.ncqa.org)) planned for September 15, 2021.

## RESULTS ON KEY SURVEY MEASURES

All results reported in this section are based on the rates of members answering 9 or 10 for the overall rating questions and *Usually* or *Always* for all other CAHPS measures.

### STATISTICALLY SIGNIFICANT IMPROVEMENTS OR DECLINES IN PERFORMANCE COMPARED TO 2020

Reportable* Rate IMPROVED	Reportable* Rate DECLINED
No statistically significant improvements	No statistically significant declines

\* Includes CAHPS ratings and composites that achieved a reportable result (100 or more valid responses). Excludes Children with Chronic Conditions (CCC) measures. The following measures are not reportable by NCQA due to insufficient denominator (less than 100 valid responses): Rating of Specialist Seen Most Often, Coordination of Care.

### STATISTICALLY SIGNIFICANT DIFFERENCES IN PERFORMANCE COMPARED TO NATIONAL BENCHMARKS

Reportable* Rate ABOVE Benchmark	Reportable* Rate BELOW Benchmark
<b>2021 CSS Child Medicaid Average</b>	
None	None
<b>2020 NCQA Quality Compass National Average (All LOBs)</b>	
Rating of All Health Care (78.41% vs. 71.92% [+6.49 points])	None

\* Includes CAHPS ratings and composites that achieved a reportable result (100 or more valid responses). Excludes Children with Chronic Conditions (CCC) measures. The following measures are not reportable by NCQA due to insufficient denominator (less than 100 valid responses): Rating of Specialist Seen Most Often, Coordination of Care.

## ESTIMATED 2021 NCQA HEALTH PLAN RATINGS

Estimated* 2021 NCQA Health Plan Rating	
★★★★★	Rating of Specialist Seen Most Often, Rating of All Health Care
★★★★☆	Coordination of Care
★★★☆☆	Getting Needed Care, Getting Care Quickly, Rating of Personal Doctor
★★☆☆☆	Rating of Health Plan

\* Estimated HPR stars for applicable CAHPS measures, calculated by CSS based on the 2020 NCQA Quality Compass national benchmarks, are provided for reference only. Final HPR stars will be calculated by NCQA based on the 2021 Quality Compass benchmarks. NCQA plans to release these scored directly to plans in September of 2021.

Note: estimated star ratings are provided for all applicable CAHPS measures regardless of measure denominator.

## TOP PRIORITIES FOR QUALITY IMPROVEMENT

CSS's *Key Driver Analysis* identifies the areas of health plan performance and aspects of member experience that shape members' overall assessment of their health plan. To the extent that these experiences can be improved, the overall rating of the plan should reflect these gains. Below is a set of the quality improvement opportunities that would generate the greatest impact for ABH of LA. Effective interventions in these areas would lead to the largest gains in the *Rating of Health Plan* score.

Top Priorities for Quality Improvement
1. Improving health plan provider network (highly-rated personal doctors)
2. Improving the ability of the health plan customer service to provide necessary information or help
3. Improving member access to care (ease of getting needed care, tests, or treatment)
4. Improving health plan provider network (highly-rated specialists)

The remainder of this report examines these and other findings in more detail.

## WHAT IS NEW IN 2021

### CAHPS SURVEY UPDATES (VERSION 5.1H)

In response to significant changes in consumer behavior during the past year and the accompanying shift in care delivery toward telemedicine, NCQA updated the CAHPS Health Plan Survey to version 5.1H. Several questions were reworded to include any care received “in person, by phone, or by video” during the past six months. References to “seeing a provider” or “visiting a doctor’s office or clinic” were removed or replaced with more inclusive language to reflect this expanded array of care settings. To date, NCQA has not issued trending guidelines for the revised questionnaires.

### IMPACT OF COVID-19 ON THE 2020 NCQA QUALITY COMPASS DATASETS

Citing concerns about the impact of COVID-19 on CAHPS data collection and response rates, as well as the potential for response bias because members were asked to reflect on their health care experiences over the past year while simultaneously living through a pandemic, **NCQA released national, regional, and state benchmarks (averages and percentiles) for health plans’ internal quality improvement purposes. NCQA did not report 2020 CAHPS survey results for individual plans in Quality Compass and issued a general recommendation against using the 2020 benchmarks for improvement scoring and year-over-year trending. In this context, your organization’s 2021 survey results and any comparisons to prior-year performance benchmarks should be interpreted with caution.**

## CHANGES IN THE 2021 NCQA HEALTH PLAN RATINGS (HPR) METHODOLOGY<sup>3</sup> DUE TO COVID-19

Prior to the COVID-19 pandemic, NCQA had planned a significant overhaul of its Health Plan Ratings methodology. As a reminder, below is the list of Patient Experience (CAHPS) measures included in NCQA’s Medicaid Health Plan Ratings:

Measure Domain	Individual Measures Included in HPR (Assigned Star Ratings)
<b>Patient Experience</b>	
Getting Care	Getting Needed Care, Getting Care Quickly (percent <i>Usually</i> or <i>Always</i> )
Satisfaction with Plan Physicians	Rating of Personal Doctor, Rating of Specialist Seen Most Often, Rating of All Health Care (percent 9 or 10) Coordination of Care (percent <i>Usually</i> or <i>Always</i> )
Satisfaction with Plan Services	Rating of Health Plan (percent 9 or 10)

Health Plan Ratings are reported to the public on a five-star scale, indicating how well a plan is performing compared to NCQA’s Quality Compass national benchmarks. NCQA’s original (2020) HPR methodology, released just prior to the COVID-19 pandemic, had relied on prior-year Quality Compass benchmarks for assignment of star ratings. NCQA had concerns about using the 2020 CAHPS data for public reporting and canceled the 2020 Health Plan Ratings because of the pandemic. NCQA decided to base the 2021 Health Plan Ratings on the current-year (2021) national benchmarks. This decision has significant implications for current and future reporting.

- Because NCQA will calculate final 2021 Health Plan Ratings based on the 2021 Quality Compass data submissions, the results will not be available to plans until September of 2021<sup>4</sup>. Therefore, **CSS can only estimate Health Plan Ratings based on the 2020 benchmarks at this time. Star rating estimates in this report are based on the prior-year (2020) NCQA Quality Compass National benchmarks, the most recent dataset available to date.**
- NCQA has not finalized the 2022 Health Plan Ratings methodology. NCQA may choose to continue using current-year benchmarks for HPR 2022 or revert to the original methodology, which relies on prior-year benchmarks. NCQA expects to make this decision in the summer of 2021.

<sup>3</sup> For more information, please refer to [www.ncqa.org/hedis/reports-and-research/ncqas-health-plan-ratings-2021/](http://www.ncqa.org/hedis/reports-and-research/ncqas-health-plan-ratings-2021/) and Appendix B

<sup>4</sup> NCQA has scheduled a private release of final ratings to individual plans in early September, with a final public release (at [www.ncqa.org](http://www.ncqa.org)) planned for September 15, 2021

## UPDATES TO THE 2021 CSS CAHPS SURVEY RESULTS REPORT

CSS has made several updates to the 2021 CAHPS Results Reports:

- Measure denominators and three-year score trends have been added to key exhibits.
- CSS recognizes that NCQA will not release the 2021 Health Plan Ratings until September of 2021. As a courtesy to Aetna Better Health, CSS is providing estimated star ratings based on the available 2020 Quality Compass national benchmarks in accordance with NCQA's scoring guidelines. **The CSS-calculated star ratings should be treated as unofficial estimates and used with caution for internal purposes only.**
- The CSS *Key Driver Model* has been updated using CSS's Book-of-Business data collected over the past two years.
- An updated *Health Plan Quality Improvement Resource Guide* is included.

## ABOUT THIS REPORT

The key features of this 2021 CAHPS results report are highlighted below.

- Except for the five measures designed for the population of children with chronic conditions (CCC), the results presented in this report pertain to the general Child Medicaid population only. CCC measure results are based on responses collected from both the general and supplemental CCC samples that met NCQA's criteria for inclusion in the CCC measure set.
- CSS calculated survey results following NCQA's guidelines in *HEDIS 2021, Volume 3: Specifications for Survey Measures*. All results are reported regardless of measure denominator.
- As a courtesy to Aetna Better Health, CSS is providing estimated Health Plan Ratings (star ratings) based on the available 2020 Quality Compass national benchmarks. **The CSS-calculated star ratings should be treated as unofficial estimates and used with caution for internal purposes only.** Estimated star ratings are provided regardless of measure denominator. NCQA is expected to release final 2021 Health Plan Ratings in September.
- Throughout the report, the 2021 ABH of LA survey results are compared to national benchmark scores, represented by the 2021 CSS Child Medicaid Average and the 2020 NCQA Quality Compass Child Medicaid National Average for All Lines of Business (LOBs). The 2021 CSS Child Medicaid Average was calculated by pooling survey responses across 21 Child Medicaid plans surveyed and selected by CSS to represent the industry average. The 2020 NCQA Quality Compass Child Medicaid National Average (All LOBs) is made up of Child Medicaid plans that submitted data to NCQA.
- *Executive Summary* provides a high-level overview of survey findings for ABH of LA, including estimated 2021 HPR star ratings. This section highlights the areas where ABH of LA performs significantly above or below national benchmarks. If prior-year survey results are available, any statistically significant improvements or declines on key survey measures are also noted. Top organizational priorities for quality improvement based on CSS's *Key Driver Analysis* are identified.
- *Summary of Survey Results* presents the 2021 ABH of LA survey scores on key measures, including question summary rates, global proportions, and estimated star ratings; changes in rates and global proportion scores from the previous year (if applicable); and comparisons to relevant national benchmarks. Statistically significant differences in scores are noted.
- *Detailed Performance Charts* are provided for the rating questions, composite measures, and individual survey items representing the various CAHPS domains of care. The 2021 ABH of LA results are compared to the 2021 CSS Child Medicaid Average on all measures. Where appropriate, the 2021 summary rates and global proportions are also compared to the 2020 NCQA Quality Compass Child Medicaid National Average (All LOBs) and performance percentiles, calculated by NCQA. Where available, a three-year trend in scores is also shown.

- *Member Profile and Analysis of Plan Ratings by Member Segment* compares the 2021 ABH of LA respondent profile to the relevant national distribution(s) of demographic characteristics and utilization variables. Variation in *Rating of Health Plan* measure by member segment is examined.
- *Key Driver Analysis* identifies key member experience touch points that appear to drive the overall *Rating of Health Plan*. The *CSS Key Driver Model* quantifies the contribution of each key driver to the overall member assessment of the plan. The 2021 ABH of LA results on each key driver are compared to the highest score among the 21 plans contributing to the 2021 CSS Child Medicaid Average, yielding a measure of available room for improvement in each area. The result is then weighted by the key driver's contribution to the overall *Rating of Health Plan* score. Opportunities for improvement are prioritized based on the expected improvement in the ABH of LA *Rating of Health Plan* score due to improved performance on the key driver measure. A separate section of the report provides some helpful resources for health plan quality improvement.
- The *Appendix* includes:
  - Score calculation guidelines and methodology
  - A glossary of terms
  - A one-page *Survey Results at a Glance* summary
  - Detailed cross-tabulations of survey responses for every survey question, with additional tables summarizing performance on key survey measures
  - A copy of the survey instrument and supporting materials

## SURVEY METHODOLOGY

### SURVEY PROTOCOL AND TIMELINE

CSS administered the Child Medicaid with CCC Measure version of the 2021 CAHPS Health Plan Survey on behalf of ABH of LA in accordance with the NCQA methodology detailed in *HEDIS 2021, Volume 3: Specifications for Survey Measures and Quality Assurance Plan for HEDIS 2021 Survey Measures*. The survey can be administered using a mail-only or a mixed methodology (mail with telephone follow-up). These standard survey protocols include two questionnaire mailings, each followed by a reminder postcard. Depending on the protocol chosen, non-respondents are either sent a third, final, survey package (mail-only methodology) or contacted by telephone (mixed methodology).

ABH of LA elected to use the standard mixed methodology.

The key milestones of the CAHPS data collection protocol are provided below:

- An initial survey package was mailed on February 17.
- An initial reminder/thank-you postcard was mailed on February 25.
- A replacement survey package was mailed on March 25.
- A second reminder/thank-you postcard was mailed on April 5.
- A telephone follow-up phase targeting non-respondents, with up to six telephone follow-up attempts spaced at different times of the day and on different days of the week, started on April 10.
- Data collection closed on May 13.

Survey results were submitted to NCQA on May 26, 2021.

## SURVEY MATERIALS

CSS designed all member-facing materials (see Appendix) for Aetna Better Health in accordance with the NCQA guidelines detailed in *HEDIS 2021, Volume 3: Specifications for Survey Measures and Quality Assurance Plan for HEDIS 2021 Survey Measures*. Standard NCQA text was used for all materials. Prior to being customized with the health plan name, logo, and other branding elements, all generic materials designed by CSS were approved by NCQA.

The survey instrument was the Child Medicaid with CCC Measure version of the Health Plan CAHPS 5.1H survey. Besides the core CAHPS questions, the survey included two supplemental questions added by the plan. In addition to English, sample members had the option to request the survey in Spanish using a telephone request line.

The carrier envelope used for survey mailings was marked “RESPONSE NEEDED” or “FINAL REMINDER – PLEASE RESPOND!”, depending on the mailing wave, to improve the likelihood of response. Each survey package included a postage-paid business reply envelope.

## SAMPLE SELECTION

For the Child Medicaid with CCC Measure survey (general population), sample-eligible members were defined as plan members who were 17 years old or younger as of December 31, 2020; were currently enrolled; had been continuously enrolled for six months (with no more than one enrollment break of 45 days or less); and whose primary coverage was through Medicaid. Eligibility for the Children with Chronic Conditions (CCC population) sample was determined using a pre-screen status code, which identified children likely to have a chronic condition based on claim and encounter records.

Prior to sampling, CSS carefully inspected the member file(s) and noted any errors or irregularities found (such as incomplete contact information or subscriber numbers). Once the quality assurance process had been completed, CSS processed member addresses through the USPS National Change of Address (NCOA) service to ensure that the mailing addresses were up to date. The final sample was generated following the NCQA systematic sampling methodology, with no more than one member per household selected to receive the survey. CSS assigned each sampled member a unique identification number, which was used to track their progress throughout the data collection process.

The standard NCQA-prescribed sample size for Child Medicaid with CCC Measure plans is 3,490 members. NCQA’s sampling methodology does not allow disenrolled members to be removed from the sample after the start of survey administration. Health plans that were unable to identify disenrollees prior to December 31, 2020 were advised to oversample (i.e., increase their sample size by a factor sufficient to compensate for members expected to leave their plan by the time the survey was fielded). Oversampling could also be used to obtain more completed surveys. ABH of LA chose to oversample by 28 percent. The final survey sample for ABH of LA included 3,952 members (2,112 from the general population and 1,840 from the CCC population).

## DATA CAPTURE

Returned questionnaires were recorded using either manual data entry or optical scanning. Responses recorded via manual data entry were keyed by two independent data entry operators, and any discrepancies between the two response records were flagged and reconciled by a supervisor. Individual responses on surveys recorded via optical scanning were sent to data entry operators if the scanning technology was unable to identify the specific response option selected with a predefined degree of certainty.

For plans following the mixed methodology, Computer Assisted Telephone Interviewing (CATI) technology was used to electronically capture survey responses obtained during telephone interviews. CATI supervisors maintained quality control by monitoring the telephone interviews and response capture by interviewers in real time and auditing recorded interviews. At least 10 percent of the interviews were monitored by supervisors.

Due to the multiple outreach attempts, multiple survey responses could be received from the same sample member. In those cases, only one survey response (the most complete survey) was included in the final analysis dataset.

## SURVEY RESPONSE RATE

During the survey fielding period, 380 general population sample members completed the survey. After final survey eligibility criteria were applied, the resulting NCQA response rate was 18.74 percent. Using the most conservative assumption about measure rates (i.e., 50%) and given the number of completed surveys received, the 95% confidence interval around measure rates is  $\pm 5.03\%$ . Additional detail on sample member status at the end of data collection (dispositions) is provided in Exhibit 1.

EXHIBIT 1. 2021 ABH OF LA CHILD MEDICAID WITH CCC MEASURE CAHPS SURVEY: SAMPLE MEMBER DISPOSITIONS AND RESPONSE RATE

Disposition	2021 Your Organization		2021 CSS Child Medicaid Average
	Number	Percent of Initial Sample	Percent of Total Initial Sample
<b>Initial Sample</b>	2,112	100.0%	100.0%
Complete and Eligible - Mail	91	4.3%	10.3%
Complete and Eligible - Phone*	287	13.6%	13.2%
Complete and Eligible - Internet**	2	0.1%	0.2%
Complete and Eligible - Total	380	18.0%	23.7%
Does not meet Eligible Population criteria	37	1.8%	1.0%
Incomplete (but Eligible)	128	6.1%	4.7%
Language barrier	47	2.2%	0.9%
Mentally or physically incapacitated	0	0.0%	0.0%
Deceased	0	0.0%	0.0%
Refusal	217	10.3%	6.5%
Nonresponse after maximum attempts	1,297	61.4%	62.8%
Added to Do Not Call (DNC) list	6	0.3%	0.4%
<b>NCQA Response Rate***</b>		<b>18.74%</b>	<b>24.18%</b>

\* Applies to plans following mixed methodology.

\*\* Any sample members who called and requested another survey were given the option to complete the survey online.

\*\*\* NCQA response rate = Complete and Eligible Surveys / [Complete and Eligible + Incomplete (but Eligible) + Refusal + Nonresponse after maximum attempts + Added to Do Not Call (DNC) List]

Below is a more detailed breakdown of completed surveys by language. In addition to English, sample members had the option to request the survey in Spanish using a telephone request line.

EXHIBIT 2. 2021 ABH OF LA CHILD MEDICAID WITH CCC MEASURE CAHPS SURVEY: COMPLETED SURVEYS BY LANGUAGE

Survey Language	General Population		CCC Population	
	Number	Percent	Number	Percent
Complete and Eligible - English	380	100.0%	277	100.0%
<b>Complete and Eligible - Total</b>	<b>380</b>	<b>100.0%</b>	<b>277</b>	<b>100.0%</b>

## SATISFACTION WITH THE EXPERIENCE OF CARE

### PATIENT EXPERIENCE OF CARE MEASURES

This section lists all CAHPS measures for which NCQA calculates results, regardless of whether the measure is included in NCQA's Health Plan Ratings. Measures that are reported in HPR (i.e., assigned a star rating) are marked with a star symbol below. **Note: any information related to HPR reporting is provided for reference only. NCQA plans to release final Health Plan Ratings for participating plans on September 15, 2021.**

#### GLOBAL RATING QUESTIONS

CAHPS Health Plan Survey (version 5.1H) includes four global rating questions that utilize the scale of 0 to 10, representing the lowest and highest possible ratings. Results are based on the proportion of members selecting one of the top two ratings (9 or 10) to align with NCQA's 2021 Health Plan Ratings Methodology. For convenience and trending, the proportion of respondents rating 8, 9, or 10 is also provided.

- ★ **Rating of Personal Doctor** (0 = worst personal doctor possible; 10 = best personal doctor possible) is included in HPR as part of the *Satisfaction with Plan Physicians* sub-domain.
- ★ **Rating of Specialist Seen Most Often** (0 = worst specialist possible; 10 = best specialist possible) is included in HPR as part of the *Satisfaction with Plan Physicians* sub-domain.
- ★ **Rating of All Health Care** (0 = worst health care possible; 10 = best health care possible) is included in HPR as part of the *Satisfaction with Plan Physicians* sub-domain.
- ★ **Rating of Health Plan** (0 = worst health plan possible; 10 = best health plan possible) is included in HPR as part of the *Satisfaction with Plan Services* sub-domain.

#### CAHPS COMPOSITES

NCQA calculates results for several CAHPS composite measures. CAHPS composites combine results from related survey questions into a single measure to summarize health plan performance in the areas listed below. The following composites are reported for the general child Medicaid population:

★ **Getting Needed Care** combines two survey questions that address member access to care. Both questions use a *Never, Sometimes, Usually, or Always* response scale, with *Always* being the most favorable response. This measure is included in HPR under the sub-domain of *Getting Care*. Results are based on the proportion of members answering the following questions as *Usually* or *Always*:

- *In the last 6 months, how often was it easy to get the care, tests, or treatment your child needed?*
- *In the last 6 months, how often did you get an appointment for your child with a specialist as soon as you needed?*

★ **Getting Care Quickly** combines responses to two survey questions that address timely availability of both urgent and check-up/routine care. The questions use a *Never, Sometimes, Usually, or Always* scale, with *Always* being the most favorable response. This measure is reported in HPR under the sub-domain of *Getting Care*. Results are based on the proportion of members selecting *Usually* or *Always* in response to the following questions:

- *In the last 6 months, when your child needed care right away, how often did your child get care as soon as he or she needed?*
- *In the last 6 months, how often did you get an appointment for a check-up or routine care for your child as soon as your child needed?*

★ **Coordination of Care** is based on a single survey question, which uses a *Never, Sometimes, Usually, or Always* scale (with *Always* being the most favorable response). This measure is reported in HPR under the *Satisfaction with Plan Physicians* sub-domain. Results are based on the proportion of members selecting *Usually* or *Always* in response to the question below:

- In the last 6 months, how often did your child’s personal doctor seem informed and up-to-date about the care your child got from these doctors or other health providers?

• **How Well Doctors Communicate** combines responses to four survey questions that address physician communication. The questions use a *Never, Sometimes, Usually, or Always* scale, with *Always* being the most favorable response. Results are reported as the proportion of members answering the following questions as *Usually* or *Always*:

- *In the last 6 months, how often did your child’s personal doctor explain things about your child’s health in a way that was easy to understand?*
- *In the last 6 months, how often did your child’s personal doctor listen carefully to you?*
- *In the last 6 months, how often did your child’s personal doctor show respect for what you had to say?*
- *In the last 6 months, how often did your child’s personal doctor spend enough time with your child?*

- **Customer Service** combines responses to two survey questions that ask about member experience with the health plan’s customer service. The questions use a *Never, Sometimes, Usually, or Always* scale, with *Always* being the most favorable response. Results are reported as the proportion of members selecting *Usually* or *Always* in response to the following questions:

- *In the last 6 months, how often did customer service staff at your child’s health plan give you the information or help you needed?*
- *In the last 6 months, how often did customer service staff at your child’s health plan treat you with courtesy and respect?*

Additionally, NCQA calculates and reports the following measures for the CCC population:

- **Access to Specialized Services** combines responses to three survey questions addressing the child’s access to special equipment or devices, therapies, treatments, or counseling. The questions use a *Never, Sometimes, Usually, or Always* scale, with *Always* being the most favorable response. Results are reported as the proportion of members answering the following questions as *Usually* or *Always*:

- *In the last 6 months, how often was it easy to get special medical equipment or devices for your child?*
- *In the last 6 months, how often was it easy to get this therapy for your child?*
- *In the last 6 months, how often was it easy to get this treatment or counseling for your child?*

- **Personal Doctor Who Knows Child** combines responses to three survey questions addressing the doctor’s understanding of the child’s health issues. The questions use a *Yes* or *No* scale. Results are reported as the proportion of members answering *Yes* to the following questions:

- *In the last 6 months, did your child’s personal doctor talk with you about how your child is feeling, growing, or behaving?*
- *Does your child’s personal doctor understand how these medical, behavioral, or other health conditions affect your child’s day-to-day life?*
- *Does your child’s personal doctor understand how your child’s medical, behavioral, or other health conditions affect your family’s day-to-day life?*

- **Coordination of Care for Children with Chronic Conditions** combines responses to two survey items addressing care coordination needs related to the child’s chronic condition. The questions use a *Yes* or *No* scale. Results are reported as the proportion of members answering *Yes* to the following questions:

- *In the last 6 months, did you get the help you needed from your child’s doctors or other health providers in contacting your child’s school or daycare?*

- *In the last 6 months, did anyone from your child’s health plan, doctor’s office, or clinic help coordinate your child’s care among these different providers or services?*
- **Getting Needed Information** is based on a single survey question, which uses a *Never, Sometimes, Usually, or Always* scale (with *Always* being the most favorable response). Results are based on the proportion of members selecting *Usually* or *Always* in response to the question below:
  - *In the last 6 months, how often did you have your questions answered by your child’s doctors or other health providers?*
- **Access to Prescription Medicines** is based on a single survey question, which uses a *Never, Sometimes, Usually, or Always* scale (with *Always* being the most favorable response). Results are based on the proportion of members selecting *Usually* or *Always* in response to the question below:
  - *In the last 6 months, how often was it easy to get prescription medicines for your child through his or her health plan?*

## CALCULATION AND REPORTING OF RESULTS

### QUESTION SUMMARY RATES AND COMPOSITE GLOBAL PROPORTIONS

**Question Summary Rates** express the proportion of respondents selecting the desired response option(s) on a survey question. Examples include percent selecting *Usually* or *Always* or percent rating 9 or 10.

**Composite Global Proportions** express the proportion of respondents selecting the desired response option(s) from a predefined set of two or more related questions on the survey. The proportions are calculated by first determining the relevant proportion on each survey question contributing to the composite and then averaging these proportions across all questions in the composite.

Throughout the report, all question summary rates and composite global proportions are rounded to two decimal places for display purposes (e.g., 0.23456 is displayed as 23.46%). However, all calculations involving rates and proportions, including statistical significance testing, are carried out prior to rounding. For more details on the calculations please refer to *HEDIS 2021, Volume 3: Specifications for Survey Measures* or consult Appendix A.

### ESTIMATED NCQA HEALTH PLAN RATINGS (STAR RATINGS)

Health Plan Ratings, displayed as star ratings, were estimated by CSS based on NCQA’s 2021 *Health Plan Rating* methodology. **The CSS-calculated HPR star ratings should be treated as unofficial estimates and used with caution for internal purposes only.** For details, please consult [www.ncqa.org/hedis/reports-and-research/ncqas-health-plan-ratings-2021/](http://www.ncqa.org/hedis/reports-and-research/ncqas-health-plan-ratings-2021/) as well as Appendix A of this report.

## NCQA MINIMUM DENOMINATOR SIZE

For a measure result (i.e., question summary rate or composite global proportion) to be reportable by NCQA, it needs to be based on at least 100 valid responses (measure denominator). The denominator for an individual question is the total number of valid responses to that question. The denominator for a composite is the average number of responses across all questions in the composite (note: composite denominators are rounded for display purposes). If the rate denominator is less than 100, NCQA assigns a measure result of “NA.” This report presents results for all measures, regardless of denominator size.

## COMPARISONS TO NATIONAL BENCHMARKS AND PRIOR-YEAR RESULTS

Throughout the report, the 2021 ABH of LA results are compared to the 2021 CSS Child Medicaid Average as well as to the 2020 NCQA Quality Compass Child Medicaid National Average (All LOBs). The 2021 CSS Child Medicaid Average was calculated by pooling survey responses across 21 Child Medicaid plans surveyed and selected by CSS to represent the industry average. The 2020 NCQA Quality Compass Child Medicaid National Average (All LOBs) is made up of Child Medicaid plans that submitted data to NCQA.

If available, prior-year survey results are provided for comparison and year-to-year changes in results are tested for statistical significance. All of the statistical tests are conducted at the 95% confidence level (i.e., there is a 95% probability that the observed difference is not due to chance).

## CHILDREN WITH CHRONIC CONDITION (CCC) MEASURE RESULTS

The results for the CCC population presented in this report are based on survey responses. A response was included in the CCC results if the child’s parent or caretaker responded “Yes” to all of the screener questions for any one of the following summary measures:

- *Use of or Need of Prescription Medicines*
- *Above-Average Use or Need for Medical, Mental Health, or Education Services*
- *Functional Limitations Compared with Others of Same Age*
- *Use of or Need for Specialized Therapies*
- *Treatment or Counseling for Emotional or Developmental Problems*

All national benchmarks reported for these measures are limited to the CCC population.

## SUMMARY OF SURVEY RESULTS

Exhibit 3 provides a high-level ABH of LA performance overview on key survey measures. These include overall ratings, composite global proportions, and summary rates for additional measures. Where applicable, changes in scores over time and comparisons to applicable national benchmarks are reported and tested for statistical significance.

EXHIBIT 3. 2021 ABH OF LA CHILD MEDICAID WITH CCC MEASURE CAHPS SURVEY: PATIENT EXPERIENCE MEASURES

**Calculation and Reporting of Results**

All rates were calculated by CSS following NCQA specifications. The number of valid responses collected this year for each measure (n, or measure denominator) is reported in parentheses.

**Rate Comparisons and Statistical Significance Testing**

Comparisons to prior-year and benchmark rates were calculated prior to rounding and rounded for display. Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the comparison rate are marked with a ✓ symbol.

**Health Plan Ratings (HPR)**

Estimated HPR stars for applicable measures, calculated by CSS based on the 2020 NCQA Quality Compass national benchmarks, are displayed for reference only. Final HPR stars will be calculated by NCQA based on the 2021 Quality Compass benchmarks. NCQA plans to release these scored directly to plans in September of 2021.

4917000

## DETAILED PERFORMANCE CHARTS

Detailed charts are provided for CAHPS composite global proportions and question summary rates. Except for the five CCC measures, the results displayed are for the general member sample only. CCC measure results are based on responses collected from both the general and supplemental CCC samples that met NCQA's criteria for inclusion in the CCC measure set. The charts have the following features:

### TREND IN RESULTS

- Survey scores are trended over three consecutive years of data collection, if available. A result may not be available if the survey was not administered in a given year, if the measure is new, or if the measure is not deemed appropriate for trending. In such cases, "no data" appears in place of the score.
- The number of valid responses (the NCQA-defined denominator, *n*) appears above each bar. If the number of responses is less than 100, "NA" appears next to the value of *n*, indicating that the result is not reportable by NCQA.
- Statistical comparisons are conducted between the current-year and each of the prior-year rates, if available. Differences in rates are tested for statistical significance at the 95% confidence level. Statistically significant differences are marked with a ✓ (checkmark) symbol next to the comparison score. For example, a checkmark appearing next to the 2020 rate denotes a statistically significant difference between the 2021 and 2020 rates.

### COMPARISON TO NATIONAL BENCHMARKS AND NCQA QUALITY COMPASS PERCENTILES

To help health plans benchmark their performance on key CAHPS measures, CSS licensed the *2020 NCQA Quality Compass CAHPS Benchmarks*. This dataset includes question summary rates and global proportions corresponding to the national Quality Compass averages, as well as the 10<sup>th</sup>, 33<sup>rd</sup>, 67<sup>th</sup>, and 90<sup>th</sup> performance percentiles for all lines of business. CSS's agreement with NCQA authorizes CSS to provide this information to eligible client organizations for their internal use only. Public reporting of these results is not authorized under the terms of this agreement. **Reminder: because NCQA recommended against using the 2020 benchmarks for improvement scoring and year-over-year trending, comparisons of your organization's results to these benchmarks should be made with caution.**

- For CAHPS ratings and composites, the bar representing the 2021 ABH of LA score is juxtaposed against the 2020 NCQA percentile distribution, providing an indication of its competitive position on the measure and, if applicable, an estimated HPR (star) rating.
- The horizontal lines displayed on the charts correspond to the 2021 CSS Child Medicaid Average as well as the 2020 NCQA Quality Compass Child Medicaid National Average (All LOBs). If the 2021 ABH of LA score is significantly different from any of these benchmark scores at the 95% confidence level, a checkmark appears next to the relevant score.

# Rating of All Health Care

Percent Responding 9 or 10

4917000

Estimated Health Plan Rating (HPR) stars for this measure, calculated by CSS based on the 2020 NCQA Quality Compass national benchmarks, are displayed for reference only. Final HPR Stars will be calculated by NCQA based on the 2021 Quality Compass benchmarks. NCQA plans to release these scores directly to plans in September of 2021.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Rating of All Health Care

Percent Responding 8, 9 or 10

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Rating of Personal Doctor

Percent Responding 9 or 10

4917000

Estimated Health Plan Rating (HPR) stars for this measure, calculated by CSS based on the 2020 NCQA Quality Compass national benchmarks, are displayed for reference only. Final HPR Stars will be calculated by NCQA based on the 2021 Quality Compass benchmarks. NCQA plans to release these scores directly to plans in September of 2021.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Rating of Personal Doctor

Percent Responding 8, 9 or 10

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Rating of Specialist Seen Most Often

Percent Responding 9 or 10

4917000

Estimated Health Plan Rating (HPR) stars for this measure, calculated by CSS based on the 2020 NCQA Quality Compass national benchmarks, are displayed for reference only. Final HPR Stars will be calculated by NCQA based on the 2021 Quality Compass benchmarks. NCQA plans to release these scores directly to plans in September of 2021.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Rating of Specialist Seen Most Often

Percent Responding 8, 9 or 10

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Rating of Health Plan

Percent Responding 9 or 10

4917000

Estimated Health Plan Rating (HPR) stars for this measure, calculated by CSS based on the 2020 NCQA Quality Compass national benchmarks, are displayed for reference only. Final HPR Stars will be calculated by NCQA based on the 2021 Quality Compass benchmarks. NCQA plans to release these scores directly to plans in September of 2021.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Rating of Health Plan

Percent Responding 8, 9 or 10

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Getting Needed Care

Percent Responding Always or Usually

4917000

Estimated Health Plan Rating (HPR) stars for this measure, calculated by CSS based on the 2020 NCQA Quality Compass national benchmarks, are displayed for reference only. Final HPR Stars will be calculated by NCQA based on the 2021 Quality Compass benchmarks. NCQA plans to release these scores directly to plans in September of 2021.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Getting Needed Care: Ease of Getting Needed Care (Q10)

Percent Responding Always or Usually

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Getting Needed Care: Ease of Seeing a Specialist (Q41)

Percent Responding Always or Usually

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Getting Care Quickly

Percent Responding Always or Usually

4917000

Estimated Health Plan Rating (HPR) stars for this measure, calculated by CSS based on the 2020 NCQA Quality Compass national benchmarks, are displayed for reference only. Final HPR Stars will be calculated by NCQA based on the 2021 Quality Compass benchmarks. NCQA plans to release these scores directly to plans in September of 2021.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Getting Care Quickly: Ease of Getting Urgent Care (Q4)

Percent Responding Always or Usually

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Getting Care Quickly: Ease of Getting a Check-up or Routine Care (Q6)

Percent Responding Always or Usually

4917000

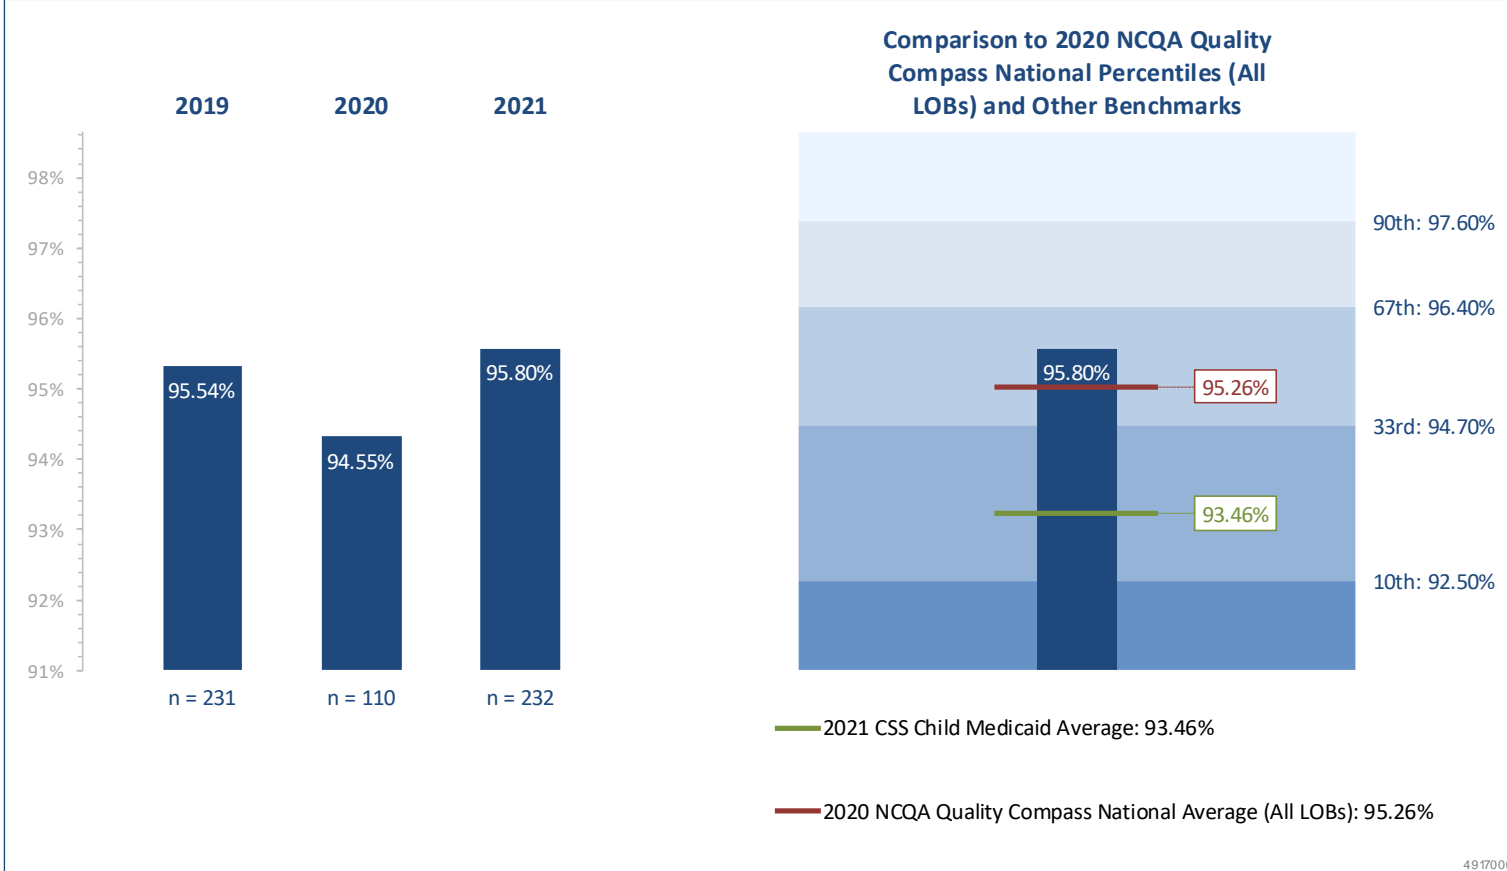

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# How Well Doctors Communicate

Percent Responding Always or Usually

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# How Well Doctors Communicate: Doctor Explained Things (Q27)

Percent Responding Always or Usually

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

## How Well Doctors Communicate: Doctor Listened Carefully (Q28)

Percent Responding Always or Usually

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

## How Well Doctors Communicate: Doctor Showed Respect (Q29)

Percent Responding Always or Usually

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# How Well Doctors Communicate: Doctor Spent Enough Time (Q32)

Percent Responding Always or Usually

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Customer Service

Percent Responding Always or Usually

4917000

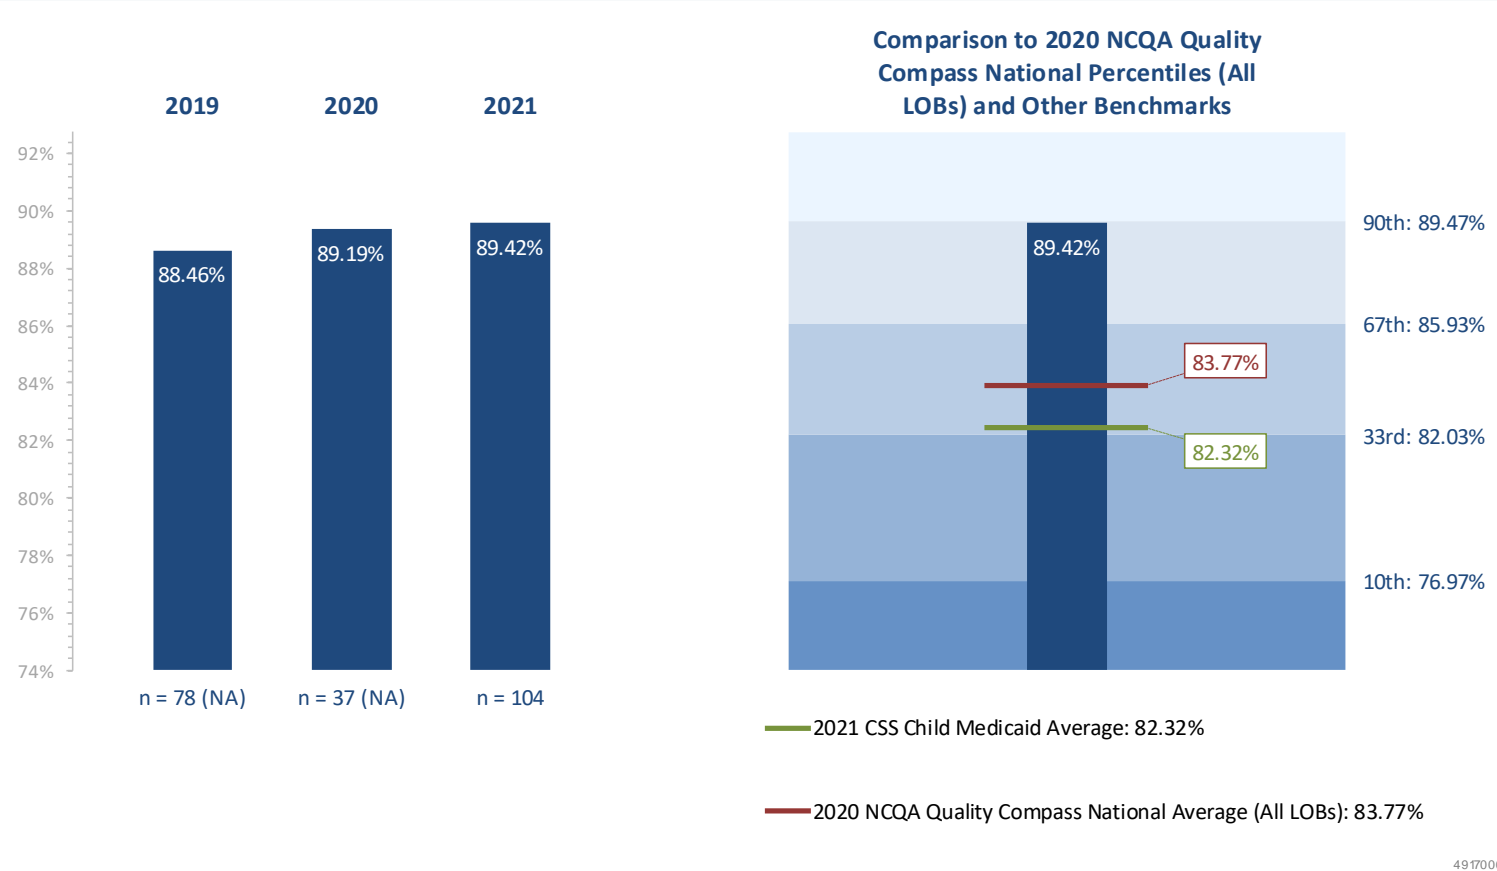

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Customer Service: Customer Service Provided Information/Help (Q45)

Percent Responding Always or Usually

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Customer Service: Customer Service Was Courteous/Respectful (Q46)

Percent Responding Always or Usually

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Coordination of Care

Percent Responding Always or Usually

4917000

Estimated Health Plan Rating (HPR) stars for this measure, calculated by CSS based on the 2020 NCQA Quality Compass national benchmarks, are displayed for reference only. Final HPR Stars will be calculated by NCQA based on the 2021 Quality Compass benchmarks. NCQA plans to release these scores directly to plans in September of 2021.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Access to Prescription Medicines

Percent Responding Always or Usually

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Access to Specialized Services

Percent Responding Always or Usually

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Getting Needed Information

Percent Responding Always or Usually

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Personal Doctor Who Knows Child

Percent Responding Yes

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

# Coordination of Care for Children With Chronic Conditions

Percent Responding Yes

4917000

This measure is not included in NCQA's Health Plan Ratings.

All rates were calculated by CSS following NCQA specifications. The denominator (n) represents the number of valid responses collected for the measure. At least 100 valid responses must be collected for a measure result to be reportable by NCQA. If n is less than 100, 'NA' is displayed next to the value of n, indicating that the result is not reportable by NCQA.

Comparisons to prior-year and benchmark rates are reported regardless of whether the rate meets the minimum denominator threshold for NCQA reporting (n=100). Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between the current-year rate and the relevant comparison rate are marked with a checkmark symbol next to the comparison rate.

## MEMBERSHIP PROFILE AND ANALYSIS OF PLAN RATINGS BY MEMBER SEGMENT

This section of the report presents a detailed profile of the ABH of LA membership, including demographics, self-reported health status, and responses to survey questions that assess utilization of healthcare services.

A health plan's membership mix is shaped by multiple factors, most of which are beyond the scope of the CAHPS survey. These include benefit design, geography, availability of health plan choices, and member self-selection into products that best meet their needs. CSS's analysis of industry data suggests that there is considerable variation in member demographic makeup and utilization patterns across plans. To the extent that various member segments have distinct healthcare needs, utilization patterns, expectations, experiences, as well as attitudes and perceptions, their assessments of the same plan will likely differ.

Certain member characteristics (e.g., health status) appear to be directly related to differences in healthcare needs and utilization levels. For example, some plans have predominantly healthy members, whose interactions with care providers and the plan tend to be limited. By contrast, other plans serve populations with higher rates of illness. These members tend to have more frequent encounters with the healthcare system and as a result may become more experienced users of health plans. The ways in which members use the plan, the frequency of their interactions with providers and staff, and their overall level of familiarity with how the plan works may affect ratings.

In addition to health care needs and utilization patterns, demographic characteristics have been shown to influence survey responses. For example, all else being equal, older respondents and members of certain ethnic groups tend to rate their health care providers and plans more positively. By contrast, more educated members rate more critically, regardless of age or ethnicity.

While the interplay between these membership variables (often referred to as the plan's "case mix") and health plan ratings is complex, health plan ratings clearly vary across demographic groups and user segments. Understanding the plan's case mix can help managers to gain insight into possible sources of this variation.

The charts on the following pages show how *Rating of Health Plan* (% 9 or 10) varies by the member subgroup of ABH of LA compared to the relevant national benchmark distribution(s). Each demographic or utilization subgroup is represented by a "bubble" on the chart. The label above the bubble and the percentage in square brackets below it identify the subgroup and its size. The area of the bubble visually represents the size of the subgroup. Unless a member belongs to more than one subgroup (e.g., race category), subgroup sizes should add up to 100%. Note that these charts only include members who answered the relevant demographic/utilization question on the survey and provided a valid response to the *Rating of Health Plan* question. For this reason, the reported subgroup sizes may differ slightly from the proportions reported in the cross-tabulations.

## HEALTH STATUS AND DEMOGRAPHICS

The following characteristics are profiled in this section:

- Health status
- Gender
- Age
- Race
- Ethnicity (Hispanic or Latino)
- Education level

Only includes surveys with a valid response to the Rating of Health Plan question. The bracketed percentage below each subgroup and the corresponding bubble size (by area) represent the proportion of respondents in the subgroup providing a valid 0 to 10 health plan rating. The reported rate for the Health Plan Rating question is % 9 or 10. Results are reported only if 5 or more valid responses (n) were obtained.

## Respondent Gender and Age

Only includes surveys with a valid response to the Rating of Health Plan question. The bracketed percentage below each subgroup and the corresponding bubble size (by area) represent the proportion of respondents in the subgroup providing a valid 0 to 10 health plan rating. The reported rate for the Health Plan Rating question is % 9 or 10. Results are reported only if 5 or more valid responses (n) were obtained.

# Member Gender and Age

Only includes surveys with a valid response to the Rating of Health Plan question. The bracketed percentage below each subgroup and the corresponding bubble size (by area) represent the proportion of respondents in the subgroup providing a valid 0 to 10 health plan rating. The reported rate for the Health Plan Rating question is % 9 or 10. Results are reported only if 5 or more valid responses (n) were obtained.

## Member Race and Ethnicity

Only includes surveys with a valid response to the Rating of Health Plan question. The bracketed percentage below each subgroup and the corresponding bubble size (by area) represent the proportion of respondents in the subgroup providing a valid 0 to 10 health plan rating. The reported rate for the Health Plan Rating question is % 9 or 10. Results are reported only if 5 or more valid responses (n) were obtained.

Only includes surveys with a valid response to the Rating of Health Plan question. The bracketed percentage below each subgroup and the corresponding bubble size (by area) represent the proportion of respondents in the subgroup providing a valid 0 to 10 health plan rating. The reported rate for the Health Plan Rating question is % 9 or 10. Results are reported only if 5 or more valid responses (n) were obtained.

## USE OF SERVICES

The following utilization measures are included in this section:

- Type of care received
- Frequency of visits
- Care received from personal doctor
- Specialty and other non-primary care

Only includes surveys with a valid response to the Rating of Health Plan question. The bracketed percentage below each subgroup and the corresponding bubble size (by area) represent the proportion of respondents in the subgroup providing a valid 0 to 10 health plan rating. The reported rate for the Health Plan Rating question is % 9 or 10. Results are reported only if 5 or more valid responses (n) were obtained.

Only includes surveys with a valid response to the Rating of Health Plan question. The bracketed percentage below each subgroup and the corresponding bubble size (by area) represent the proportion of respondents in the subgroup providing a valid 0 to 10 health plan rating. The reported rate for the Health Plan Rating question is % 9 or 10. Results are reported only if 5 or more valid responses (n) were obtained.

# Non-Primary Care

	All Respondents	Q34. Visited Providers Besides Personal Doctor	Q40. Made Specialist Appointment(s)	Q42. Number of Specialists Seen
Your Organization	<p>All respondents [100.0%]</p> <p>Rating of Health Plan 69.1%</p>	<p>Yes [41.6%] 68.1%</p> <p>No [58.4%] 76.5%</p>	<p>Yes [19.8%] 70.4%</p> <p>No [80.2%] 68.8%</p>	<p>None [7.2%] 60.0%</p> <p>1 [63.8%] 68.2%</p> <p>2 [23.2%] 81.3%</p> <p>3 [2.9%] n&lt;5</p> <p>4 [1.4%] n&lt;5</p> <p>5 or more [1.4%] n&lt;5</p>
2021 CSS Child Medicaid Average	<p>All respondents [100.0%]</p> <p>Rating of Health Plan 70.3%</p>	<p>Yes [35.5%] 71.1%</p> <p>No [64.5%] 74.7%</p>	<p>Yes [17.9%] 70.4%</p> <p>No [82.1%] 70.3%</p>	<p>None [6.2%] 64.0%</p> <p>1 [63.2%] 72.2%</p> <p>2 [19.1%] 71.5%</p> <p>3 [7.1%] 61.8%</p> <p>4 [2.1%] 71.1%</p> <p>5 or more [2.2%] 51.2%</p>

Only includes surveys with a valid response to the Rating of Health Plan question. The bracketed percentage below each subgroup and the corresponding bubble size (by area) represent the proportion of respondents in the subgroup providing a valid 0 to 10 health plan rating. The reported rate for the Health Plan Rating question is % 9 or 10. Results are reported only if 5 or more valid responses (n) were obtained.

## KEY DRIVER ANALYSIS

### OBJECTIVES

CSS's *Key Driver Analysis (KDA)* highlights some of the key differences between high- and low-rated health plans at the industry level. The principal objectives of the KDA are:

- To isolate a set of plan attributes, or key drivers, that distinguish high-rated plans from low-rated plans
- To highlight industry best practices on the key driver measures
- To compare the current performance of ABH of LA to industry best practices in these areas
- To estimate the impact of improving performance on these measures on the *Rating of Health Plan* measure

### TECHNICAL APPROACH

#### INDUSTRY VIEW

Industry-level analysis, which uses health plans as units of analysis, has several important advantages compared to the alternative approach, which focuses on member experiences *within* a single plan. Certain plan attributes are strongly related to member satisfaction *at the industry level*. However, these relationships may be missed if we focus on only one plan at a time. For example, it has been shown that plans that are rated highly on measures of access and availability of care tend to have high overall ratings. Conversely, poor access scores are associated with low overall plan scores. This relationship is clear when ratings are compared *across* plans. However, *within* a specific plan, member experiences may not be sufficiently varied to reveal the underlying relationship. That is, if all members are equally dissatisfied with access to care, this measure will show a misleadingly low correlation with the overall rating of the plan. As a result, the plan may underestimate the key role of access to care as a driver of member satisfaction and miss a critical opportunity for improvement.

In addition, expressing every CAHPS survey variable as a plan-level rate yields a complete and rich information set on each plan. This effectively eliminates any “gaps” in respondent-level data from a single plan caused by survey skip patterns and allows every response to be used in the analysis.

Finally, in addition to the standard CAHPS performance measures, other sources of differences between health plans can be explored, increasing the explanatory power of the model and allowing for more precise estimation of the individual key driver effects. These include experience rates, which are based on responses to the CAHPS screener questions. Screeners establish whether a member had a particular type of experience or interaction with the plan (e.g., contacted customer service, submitted a claim, etc.). CSS's analysis shows that these experience indicators explain a significant portion of the plan's overall

satisfaction score. Additional components of the overall score include utilization rates and demographic characteristics of the plan's membership, addressed in more detail in the *Member Profile and Analysis of Plan Ratings by Member Segment* section of this report. Clearly, from the plan's perspective, some of these factors are more actionable than others. However, to yield an accurate model of key drivers of member satisfaction, the analysis must consider all measurable influences on the overall rating of the plan.

## IMPACT OF COVID-19 ON KEY DRIVER MODEL DEVELOPMENT AND RESULTS

Historically, CSS has relied on publicly available CAHPS survey data for insight into sources of variation in consumer ratings of health plans. Because NCQA did not release CAHPS results on individual health plans last year, CSS used its own Book-of-Business data collected during the past two survey cycles (2020 and 2021) as a substitute for the industry-wide dataset. Since the onset of the COVID-19 pandemic, countless factors have contributed to the evolution of the U.S. healthcare system, drastically influencing member experience and reshaping the performance measurement environment. The past two years have seen wide regional variation in infection rates, stay-at-home orders, mask mandates, and vaccine availability; systemic shifts in consumer and provider behavior; and changes in member interactions and experiences with the healthcare system. Variation in survey vendor practices in response to the pandemic as well as health plan decisions regarding survey protocols have further complicated the task of performance measurement. Importantly, the CAHPS survey instrument itself has been modified between 2020 and 2021 to account for the increased adoption of telemedicine tools during the pandemic. Since we do not have a way of quantifying these factors at the member or health plan level, our analysis of the key drivers of member experience is inherently limited.

The 2021 CSS *Key Driver Model* was developed using our 2020–2021 Book-of-Business plan-level dataset of Medicaid CAHPS survey results. The dataset comprised all Medicaid plans surveyed by CSS in 2020 and 2021, for a total of 277 observations. CSS performed regression analysis of health plan ratings to identify sources of variation in overall scores across the industry spectrum, using individual health plans as units of analysis. Regression analysis expresses mathematically the relationship between plan attributes (predictors) and the global *Rating of Health Plan* score, controlling for interdependencies among the predictors and other factors that may influence ratings (e.g., member demographics, utilization patterns, etc.). Predictors were chosen carefully to yield a model that is both meaningful and actionable from the health plan's point of view.

All of the plan variables, including potential drivers of member experience (i.e., variables that the plan may consider actionable) and control variables (member demographics, health status, utilization rates, product type, and year of data collection) were entered into the regression model, and the independent contribution of each variable was estimated. As in the past, CSS excluded *Rating of All Health Care* from the list of predictors, both because of its high correlation with *Rating of Health Plan* and the presence of other survey items that measure more specific aspects of member experience. If included, *Rating of all Health Care* would account for a large portion of the variance and confound coefficient estimates for the remaining variables in the model.

## INDUSTRY KEY DRIVER MODEL

The table below lists four key drivers of Medicaid member experience in order of importance, from highest to lowest, based on their relative contribution to the *Rating of Health Plan* score. These variables have statistically significant coefficients in the regression model ( $p$ -value < 0.05). Performance on these variables, together with the control variables, explains 72 percent of the industry variation in Medicaid health plan ratings. Note that this ordering reflects *only* the strength of the overall relationship between each key driver and the health plan score at the industry level. It does not consider how ABH of LA is currently performing on these measures. Improvement targets identified specifically for ABH of LA, which consider both the strength of the key driver and the current level of performance in the area, are presented graphically in the next section.

Medicaid member ratings of the plan are strongly related to members' ability to get the care they need when they need it (Q10). Being able to obtain needed information from customer service (Q45) and access to highly rated providers (Q36 and Q43) are all significant drivers of member experience.

Key Driver	Interpretation
Q36. Rating of Personal Doctor (percent 9 or 10)	The higher the proportion of members rating their personal doctor as 9 or 10, the higher the overall plan score
Q10. Ease of getting needed care, tests, or treatment (percent <i>Usually or Always</i> )	The higher the proportion of plan members reporting that the necessary care, tests, or treatment were easy to get, the higher the overall plan score
Q43. Rating of Specialist Seen Most Often (percent 9 or 10)	The higher the proportion of members rating their specialist as 9 or 10, the higher the overall plan score
Q45. Health plan customer service provided needed information or help (percent <i>Usually or Always</i> )	The higher the proportion of members who were able to get the information or help they needed from customer service, the higher the overall plan score

## OPPORTUNITIES FOR HEALTH PLAN QUALITY IMPROVEMENT

Specific improvement opportunities for ABH of LA are presented in Exhibit 4. The ordering of the key drivers reflects both the strength of each key driver in the broad industry context and how ABH of LA is currently performing on each measure.

The middle panel of the chart compares how ABH of LA is performing compared to the *Best Practice* score on each key driver. CSS defined the *Best Practice* score as the highest score among the 21 plans contributing to the 2021 CSS Child Medicaid Average. Room for improvement, represented by the green arrows on the chart, is the difference between the current level of ABH of LA performance and the *Best Practice* score.

The bar chart on the right displays the expected improvement in the overall *Rating of Health Plan* score ABH of LA could achieve if it performed on par with the *Best Practice* plan on each of the key driver measures. Each bar represents room for improvement on the key driver weighted by its contribution to the *Rating of Health Plan* score.

EXHIBIT 4. 2021 ABH OF LA CHILD MEDICAID WITH CCC MEASURE CAHPS SURVEY: KEY AREAS AND PRIORITIES FOR IMPROVEMENT

Current Key Driver Performance		Room for Improvement on Key Driver	Overall Improvement Opportunity
Your Organization's 2021 Rate		Percentage Point Difference Between Current Key Driver Score and the <b>Best Practice Score*</b>	Expected Percentage Point <b>Improvement</b> in <b>Rating of Health Plan</b> score (percent 9 or 10) if Key Driver Performs at Best Practice Level
Q36. Rating of Personal Doctor (percent 9 or 10)	79.28%	+4.25%  83.53%	 +1.76%
Q45. Customer service provided information or help (percent <i>Usually</i> or <i>Always</i> )	89.42%	+5.96%  95.38%	 +0.70%
Q10. Ease of getting needed care, tests, or treatment (percent <i>Usually</i> or <i>Always</i> )	94.74%	+1.90%  96.63%	 +0.47%
Q43. Rating of Specialist Seen Most Often (percent 9 or 10)	77.61%	+3.03%  80.65%	 +0.40%

\* Best score on the key driver measure among all plans included in the 2021 CSS Child Medicaid Average

4917000

## HEALTH PLAN QUALITY IMPROVEMENT RESOURCES FOR KEY DRIVERS

CSS's Industry *Key Driver Analysis* lists improvement opportunities and priorities for ABH of LA. The following is a list of possible interventions and resources related to each of the key drivers. This section is included as a guide to assist plan managers in their quality improvement efforts. Some of these resources may be more applicable to your organization than others, especially because many of the cited interventions are intended to be implemented at the practice or provider level. For a useful introduction to quality improvement (QI), refer to the Agency for Health Care Research and Quality's (AHRQ) reference guide that includes descriptions of QI strategies in health delivery systems ([www.ahrq.gov/sites/default/files/wysiwyg/cahps/quality-improvement/improvement-guide/4-approach-qi-process/cahps-section-4-ways-to-approach-qi-process.pdf](http://www.ahrq.gov/sites/default/files/wysiwyg/cahps/quality-improvement/improvement-guide/4-approach-qi-process/cahps-section-4-ways-to-approach-qi-process.pdf)).

### IMPROVING MEMBER ACCESS TO CARE

Removing barriers to care is central to improving the health care experience of plan members. The following resources suggest ways to improve patient access to care, tests, and treatment.

- *Same-Day Appointment Scheduling* – The Agency for Healthcare Research and Quality (AHRQ) recommends a method of scheduling that leaves part of each physician's day open for same-day appointments, rather than a traditional scheduling model that books appointments weeks or months in advance. Because the method does not differentiate between urgent and routine care, patients with non-urgent concerns are able to schedule appointments sooner than under traditional scheduling methods. For more information, see [www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/access/strategy6a-openaccess.html](http://www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/access/strategy6a-openaccess.html).
- *Implement Process Improvements to Streamline Patient Flow* – Delays experienced by patients while waiting for care, tests, or treatment can be minimized through a variety of mechanisms. For example, reallocating tasks such as physical exams and ordering x-rays to physician's assistants and nurse practitioners frees up physicians' time to attend to more pressing patient concerns. The exact form of these improvements will vary widely by practice. See [www.ahrq.gov/research/findings/final-reports/ptflow/index.html](http://www.ahrq.gov/research/findings/final-reports/ptflow/index.html) for AHRQ's guide to plan and implement patient flow improvement strategies.
- *Patient-Centered Medical Homes (PCMH)* – This model increases patient access to physicians, reducing barriers to receiving care ([www.ncbi.nlm.nih.gov/pmc/articles/PMC2869425/](http://www.ncbi.nlm.nih.gov/pmc/articles/PMC2869425/)). There are many valuable sources of information on the medical home model of care and health equity. To start, see this Institute of Medicine report: [nam.edu/wp-content/uploads/2015/06/PatientCenteredMedicalHome.pdf](http://nam.edu/wp-content/uploads/2015/06/PatientCenteredMedicalHome.pdf). Family Medicine for America's Health is a collaboration of family medicine organizations dedicated to improving health care by expanding and emphasizing primary care, particularly through the use of patient-centered medical homes. For AHRQ's resources detailing transitioning a practice to a patient-centered medical home model, see [www.pcmh.ahrq.gov/](http://www.pcmh.ahrq.gov/).

- *Alternative Access Centers* – This brief ([www.rwjf.org/content/dam/farm/reports/issue\\_briefs/2015/rwjf419415](http://www.rwjf.org/content/dam/farm/reports/issue_briefs/2015/rwjf419415)) from the Robert Wood Johnson Foundation highlights the growing capacity of retail clinics and telemedicine to meet patient medical needs, particularly in rural and underserved communities and for patients with acute but non-serious conditions who need care quickly. Providing patients with alternative venues to access health care, rather than the traditional doctor’s office or hospital, lowers barriers to care ([www.ncbi.nlm.nih.gov/pmc/articles/PMC4795318/](http://www.ncbi.nlm.nih.gov/pmc/articles/PMC4795318/)).
- *Telehealth Solutions to Pandemic-Related Issues* – The COVID-19 Pandemic has accelerated the usage and acceptance of telehealth by providers and patients alike. This article ([www.thelancet.com/journals/langlo/article/PIIS2214-109X\(20\)30362-4/fulltext](http://www.thelancet.com/journals/langlo/article/PIIS2214-109X(20)30362-4/fulltext)) details opportunities to expand telehealth beyond the pandemic. Telehealth can also be implemented to solve deferral of care issues brought about by the pandemic ([publichealth.jmir.org/2020/3/e21607?utm\\_source=TrendMD&utm\\_medium=cpc&utm\\_campaign=JMIR\\_TrendMD\\_1](http://publichealth.jmir.org/2020/3/e21607?utm_source=TrendMD&utm_medium=cpc&utm_campaign=JMIR_TrendMD_1)).

## IMPROVING HEALTH PLAN PROVIDER NETWORK

These resources concentrate on improving the physician-patient relationship, with a focus on communication. Implementing the solutions proposed here may result in patients’ increased rating of doctors.

- *Improve Physician Communication* – Much of patient dissatisfaction stems from a failure of effective physician communication ([www.ncbi.nlm.nih.gov/pmc/articles/PMC3096184/](http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3096184/)). Seminars and workshops for physicians serve as a resource for physicians to learn and practice patient-centered communication techniques. For example, The California Quality Collaborative has identified nine effective strategies for improving patient experience with health care providers in their *Improving the Patient Experience Change Package* (see [www.calquality.org/storage/Improving\\_Pt\\_Experience\\_Spread\\_Change\\_Pkg\\_UpdatedMay2011.pdf](http://www.calquality.org/storage/Improving_Pt_Experience_Spread_Change_Pkg_UpdatedMay2011.pdf)). For general recommendations related to physician communication, see [www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/communication/strategy6gtraining.html](http://www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/communication/strategy6gtraining.html).
- *Help Patients Communicate* – Patients who can effectively communicate their needs tend to have higher satisfaction with their care. AHRQ recommends four interventions that prepare patients to better communicate with their providers, including record sharing, writing down talking points prior to visits, and “coached care” programs. See [www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/communication/strategy6i-shared-decisionmaking.html](http://www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/communication/strategy6i-shared-decisionmaking.html) and [www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/communication/strategy6htools.html](http://www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/communication/strategy6htools.html). For a sample communication document that providers can distribute to patients before or during visits, see [www.rwjf.org/content/dam/farm/toolkits/toolkits/2013/rwjf404048](http://www.rwjf.org/content/dam/farm/toolkits/toolkits/2013/rwjf404048).
- *Build Physician-Patient Relationships* – An article published in the British Journal of General Practice found that patients seeing their preferred doctor rated their satisfaction with visits significantly higher than patients who did not have a doctor preference or those who would have preferred to see a different doctor. A study of English National Health Service data found that confidence and trust in a doctor is an important predictor of overall patient satisfaction ([www.ncbi.nlm.nih.gov/pubmed/18416910/](http://www.ncbi.nlm.nih.gov/pubmed/18416910/)), while a Harvard study found that a positive physician-patient relationship correlates with better healthcare outcomes ([www.ncbi.nlm.nih.gov/pmc/articles/PMC3981763/](http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3981763/)).

- *Improve Referral Communication* – The coordination of care between primary and specialist providers can be a challenge and may affect patient perceptions of their specialist care. Improving the coordination of care and case management can increase patient satisfaction with their specialist. For examples of interventions that improve care coordination efficiency and quality, see [www.ahrq.gov/innovations/index.html](http://www.ahrq.gov/innovations/index.html).

## IMPROVING CUSTOMER SERVICE AND HEALTH PLAN-RELATED INFORMATION

It is important that health plan information be provided to members and that the information addresses member concerns. As representatives of the plan, customer service staff must ensure that members have confidence and trust in their ability to address their concerns. The following resources contain recommendations for improving customer service.

- *Develop Customer Service Standards* – To improve customer service, the Agency for Healthcare Research and Quality suggests first articulating which aspects of customer service are most important to your organization. After developing these standards, monitor performance and promote accountability among staff. For more information, see [www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/customer-service/strategy6q-custservice-standards.html](http://www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/customer-service/strategy6q-custservice-standards.html).
- *Iterative Improvement for Member Services* – This RAND paper details a case study in which a health plan used additional surveys to supplement CAHPS results and thoroughly assess member dissatisfaction with customer service. Throughout the process, plan leadership continually examined and adjusted improvement goals. The intervention resulted in a reduction of wait time for customer service calls and increased member satisfaction with customer service, as measured on the CAHPS survey. See [www.rand.org/pubs/working\\_papers/WR517.html](http://www.rand.org/pubs/working_papers/WR517.html).
- *Implement Service Recovery Procedures* – When customers have a complaint, service recovery programs support customer service personnel in identifying and remedying the problem. While complaints may be inevitable, proper handling of complaints can reassure patients and restore loyalty to the health plan. For more information, see [www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/customer-service/strategy6p-service-recovery.html](http://www.ahrq.gov/cahps/quality-improvement/improvement-guide/6-strategies-for-improving/customer-service/strategy6p-service-recovery.html).
- *Make Plan Information Accessible to All Members* – A Health Research and Educational Trust study found that demographic characteristics, including education, age, gender, and income, significantly impacted use of an Internet-based decision tool. The tool provided cost information as well as a health and wellness assessment. The study suggests that effort beyond Internet-based tools is necessary to reach certain demographics. For further information, see [www.ncbi.nlm.nih.gov/pmc/articles/PMC3447236/](http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3447236/).

- *Increase Access to Trusted Health Information* – Many people look to their health plan for information not only on how the health plan works, but also on resources to help them improve their health, particularly when dealing with chronic illnesses. A recent meta-analysis confirmed that improved access to trusted health information leads to improved outcomes ([www.ncbi.nlm.nih.gov/pmc/articles/PMC5818676/](http://www.ncbi.nlm.nih.gov/pmc/articles/PMC5818676/)). The ONC Patient Engagement (PE) Playbook was created by the Office of the National Coordinator for Health Information Technology (ONC) to help healthcare professionals use health information technology (health IT) to provide better care to patients. The PE Playbook focuses specifically on electronic health record (EHR) patient portals, which allow both patients and healthcare teams, concurrent with patients' privacy preferences, to easily access patient health information — which may lead to increased benefits for healthcare, such as improved health outcomes and lower costs ([www.healthit.gov/playbook/pe/](http://www.healthit.gov/playbook/pe/)).
- *Evaluate the Organization's Health Literacy Programs* – The CDC has developed guidance on evaluating an organization's health literacy program, including recommended sources of communication and health literacy measures. See [www.cdc.gov/healthliteracy/researchevaluate/program-evaluation.html](http://www.cdc.gov/healthliteracy/researchevaluate/program-evaluation.html). The CDC's National Prevention Information Network also offers tools to create health materials in plain language to reduce health disparities ([npin.cdc.gov/pages/health-communication-language-and-literacy](http://npin.cdc.gov/pages/health-communication-language-and-literacy)).
- *Improve Patient Health Literacy* – This guide by the Office of Disease Prevention and Health Promotion outlines steps to improve health literacy, which may help patients to better absorb the information they obtain from written materials or the Internet. For detailed steps, see [health.gov/our-work/health-literacy/resources](http://health.gov/our-work/health-literacy/resources). AHRQ has also developed its own health literacy toolkit to support physicians: [www.ahrq.gov/professionals/quality-patient-safety/quality-resources/tools/literacy-toolkit/healthlittoolkit2.html](http://www.ahrq.gov/professionals/quality-patient-safety/quality-resources/tools/literacy-toolkit/healthlittoolkit2.html).

## APPENDIX A. SCORING METHODOLOGY AND GLOSSARY

### NCQA CALCULATION GUIDELINES FOR RATING AND COMPOSITE GLOBAL PROPORTIONS

NCQA's *HEDIS 2021, Volume 3: Specifications for Survey Measures* contains detailed guidelines for calculating survey results. These guidelines include:

- Criteria for including a survey in the results calculation. A questionnaire must have the final disposition code of *Complete and Valid Survey* to be included in the calculation of plan-level scores.
- Rules for handling appropriately answered questions (i.e., questions that comply with survey skip-pattern instructions).
- Rules for handling inappropriately answered questions (e.g., unanswered questions, multiple-mark questions, questions that should have been skipped, and questions within a skip pattern of an inappropriately answered or skipped gate item).
- Denominator reporting thresholds. Health plans must achieve a denominator of at least 100 responses to obtain a reportable result. If the denominator for a particular survey result calculation is less than 100, NCQA assigns a measure result of "NA".
- Rules for calculating denominators for questions and composites. The denominator for a question is equal to the total number of responses to that question. The denominator for a composite is the average number of responses across all questions in the composite.
- Rules for handling changes in submission entity (i.e., if a health plan changes how it reports CAHPS results from one year to the next.)

#### COMPOSITE GLOBAL PROPORTIONS

Global Proportions are *average* proportions of respondents who gave the plan a favorable rating on each question in a composite. The steps involved in calculating the composite global proportion are:

##### **Step 1**

For each question in a composite, determine the proportion of respondents selecting the reported response option(s).

##### **Step 2**

Calculate the average proportion across all the questions in the composite. These are the composite global proportions. Note: all questions in a composite are weighted equally, regardless of how many members respond.

Example:

Response option	Q4	Q6	Global Proportion
<i>Never or Sometimes</i>	$1 / 5 = 0.20$	$1 / 4 = 0.25$	$(0.20 + 0.25) / 2 = 0.2250$
<i>Usually</i>	$2 / 5 = 0.40$	$1 / 4 = 0.25$	$(0.40 + 0.25) / 2 = 0.3250$
<i>Always</i>	$2 / 5 = 0.40$	$2 / 4 = 0.50$	$(0.40 + 0.50) / 2 = 0.4500$
<i>Usually or Always</i>	$4 / 5 = 0.80$	$3 / 4 = 0.75$	$(0.80 + 0.75) / 2 = 0.7750$

Therefore, 80.00 percent and 75.00 percent of members respectively provided favorable responses to the *Getting Care Quickly* questions Q4 and Q6. Averaging these two proportions yields the global proportion score of 77.50 percent for the *Getting Care Quickly* composite.

## NCQA HEALTH PLAN RATINGS METHODOLOGY

### BACKGROUND: HEALTH PLAN ACCREDITATION (HPA) VS. HEALTH PLAN RATINGS (HPR) PRIOR TO 2020

**Prior to 2020**, plans could earn up to 100 points toward Accreditation from the following three sources: 50 points from Accreditation Standards (NCQA's review of the plan's quality processes, policies and procedures), 37 points from clinical quality measures (HEDIS), and 13 points from member experience measures (CAHPS). The Health Plan Accreditation (HPA) program mapped Standard elements, clinical measures (HEDIS), and member experience measures (CAHPS) to five Accreditation categories: *Access and Service*, *Qualified Providers*, *Staying Healthy*, *Getting Better*, and *Living with Illness*. Points earned in each category were divided by the total points allocated to that category, and the resulting percentage determined the number of Accreditation stars awarded by category (90% and above = four stars; 80%–89% = three stars, etc.). A plan could earn up to four stars in each of the five categories. Accreditation star ratings are currently reported on NCQA's *Health Plan Report Cards* website (see [reportcards.ncqa.org/#/health-plans/list](https://reportcards.ncqa.org/#/health-plans/list)). Health plan Accreditation status, derived from the total number of Accreditation points earned, is also listed (90–100 points = *Excellent*, 80–89.99 points = *Commendable*, and 65–79.99 points = *Accredited*).

Health Plan Ratings (HPR), reported on NCQA's *Health Insurance Plan Ratings* website ([healthinsuranceratings.ncqa.org](https://healthinsuranceratings.ncqa.org)), were based on the same three broad categories of quality measures used in HPA: clinical measures (HEDIS), member experience measures (CAHPS), and performance on NCQA Accreditation Standards. HPR scores were typically released in September. Prior to the planned 2020 refresh, HPR scores were reported on a 5-point scale in half points (not stars) and were calculated by comparing the plan's score to the same-year National All-Lines-of-Business 10<sup>th</sup>, 33.33<sup>rd</sup>, 66.67<sup>th</sup>, and 90<sup>th</sup> measure percentiles. Measures that scored at the 90<sup>th</sup> percentile level were given the rating of 5; those scoring at the 66.67<sup>th</sup> percentile level were given the rating of 4, etc. HPR included an overall plan rating as well as summary ratings in three broad domains based on HEDIS and CAHPS measures: *Consumer Satisfaction* (CAHPS), *Prevention* (HEDIS), and *Treatment* (HEDIS). The *Consumer Satisfaction* domain was further subdivided into three sub-domains based on CAHPS measures: *Getting Care*, *Satisfaction with Plan Physicians*, and *Satisfaction with Plan Services*.

### PLANNED 2020 ACCREDITATION AND HEALTH PLAN RATINGS UPDATE (PRIOR TO COVID-19)

Prior to the 2020 survey cycle, which coincided with the COVID-19 pandemic, NCQA had taken steps to align HPA (*Health Plan Report Cards*) and HPR (*Health Insurance Plan Ratings*). Below are some highlights of the HPR methodology introduced in 2020:

- The 4-point Accreditation star ratings (previously reported in *Health Plan Report Cards*), based on the percentage of total Accreditation points earned, were discontinued.
- Accredited plans must report CAHPS scores, but these scores do not directly affect the plan's Accreditation status. Since no Accreditation points are earned from CAHPS, the 3-point-scale mean calculation (which was previously used by NCQA exclusively for Accreditation scoring) is no longer supported.

- Accredited plans earn an overall star rating based on HEDIS/CAHPS reporting, which will be reported to the public on NCQA’s *Health Plan Ratings* page along with measure-, domain-, and sub-domain-level star ratings. Star ratings will be used to distinguish quality. They will replace the 5-point numeric *Health Plan Rating* and will be calculated similarly.
- The original (2020) version of the methodology benchmarked health plan performance against prior-year National All-Lines-of-Business 10<sup>th</sup>, 33.33<sup>rd</sup>, 66.67<sup>th</sup>, and 90<sup>th</sup> measure percentiles in assigning star ratings. **NCQA adjusted the benchmarking methodology for the 2021 Health Plan Ratings due to COVID-19.** Citing trending concerns, NCQA decided to base the 2021 Health Plan Ratings on the current-year (2021) national benchmarks, expected to be released in September.
- The 2022 Health Plan Ratings methodology has not been finalized. NCQA may choose to continue using current-year benchmarks for HPR 2022 or revert to the original methodology. NCQA expects to make this decision in the summer of 2021.

#### CALCULATION OF HPR STARS

Below is the list of CAHPS survey measures<sup>5</sup> included in NCQA’s Medicaid Health Plan Ratings. The *Patient Experience* domain and its three sub-domains (*Getting Care*, *Satisfaction with Plan Physicians*, and *Satisfaction with Plan Services*) are also scored and reported as star ratings.

Measure Domain	Individual Measures Included in HPR (Assigned Star Ratings)
<b>Patient Experience</b>	
Getting Care	Getting Needed Care, Getting Care Quickly (percent <i>Usually</i> or <i>Always</i> )
Satisfaction with Plan Physicians	Rating of Personal Doctor, Rating of Specialist Seen Most Often, Rating of All Health Care (percent <i>9</i> or <i>10</i> ) Coordination of Care (percent <i>Usually</i> or <i>Always</i> )
Satisfaction with Plan Services	Rating of Health Plan (percent <i>9</i> or <i>10</i> )

Note that for the overall ratings NCQA uses the *9* or *10* question summary rate for benchmarking performance and assignment of star ratings. Also note that NCQA does not include *Customer Service* in HPR. This is consistent with how this measure has been treated in HPR prior to the 2020 refresh. However, *Customer Service* was previously scored for Accreditation.

---

<sup>5</sup> Source: [www.ncqa.org/wp-content/uploads/2020/12/20201218\\_2021\\_Health\\_Plan\\_Ratings\\_Methodology.pdf](http://www.ncqa.org/wp-content/uploads/2020/12/20201218_2021_Health_Plan_Ratings_Methodology.pdf) and [www.ncqa.org/wp-content/uploads/2021/03/20210316\\_List\\_of\\_Required\\_Performance\\_Measures.pdf](http://www.ncqa.org/wp-content/uploads/2021/03/20210316_List_of_Required_Performance_Measures.pdf)

### **Step 1: Compare reported rates to the National Percentiles for All Lines of Business**

The reported rate is translated into measure rating score – the 1-5 score derived by comparing the plan’s reported rate to the prior-year national 10<sup>th</sup>, 33.33<sup>rd</sup>, 66.67<sup>th</sup> and 90<sup>th</sup> measure percentiles for All Lines of Business unless the measure has a trending concern. Due to trending concerns with 2020 data collected during the COVID-19 pandemic, NCQA is using current-year percentiles for all measures.

### **Step 2: Assign individual measure star ratings**

Individual measure rating score (ultimately reported as a star rating) is calculated as follows:

- 5 stars: a plan that is in the top decile (10 percent) of plans
- 4 stars: a plan that is in the top 3<sup>rd</sup> of plans, but not in the top 10<sup>th</sup>
- 3 stars: a plan in the middle 3<sup>rd</sup> of all plans
- 2 stars: a plan that is in the bottom 3<sup>rd</sup> of plans, but not in the bottom decile
- 1 star: a plan that is in the bottom 10 percent of plans

### **Step 3: Assign domain and sub-domain star ratings**

Measure rating scores for the *Patient Experience* domain and its three sub-domains (*Getting Care*, *Satisfaction with Plan Physicians*, and *Satisfaction with Plan Services*) are calculated using the formula:

$$\text{Domain or Sub-Domain Measure Rating Score} = \frac{\sum (\text{Measure rating} * \text{Measure Weight})}{\sum \text{Weights}}$$

All CAHPS measures have the weight of 1.5.

For example, if a plan earns 3 stars on *Getting Needed Care* and 4 stars on *Getting Care Quickly*, the plan’s *Getting Care* sub-domain score is calculated as  $(3*1.5 + 4*1.5) / (1.5 + 1.5) = 3.5$  stars.

## GLOSSARY OF TERMS

Attributes	Areas of health plan performance and member experience assessed with the CAHPS survey.
Benchmark	A reference score (e.g., the NCQA National Average rate, the CSS Book-of-Business average, or the plan's own prior-year rate) against which performance on the measure is assessed.
CAHPS Surveys	Consumer Assessment of Healthcare Providers and Systems (CAHPS) is a series of surveys designed to collect consumer feedback on their health care experiences. The CAHPS 5.1H Health Plan Survey asks members to report on their experiences with access to appointments and care through their health plan, communication with doctors available through the plan, and customer service. The Commercial plan version asks about member experiences in the previous twelve months, whereas the Medicaid version refers to the previous six months. The Medicaid version is available for adults and children; the Commercial version is for adults only. The Adult survey is intended for respondents who are 18 and older; the Child survey asks parents or guardians about the experiences of children 17 and younger. Health plans report survey results as part of HEDIS data collection. NCQA uses survey results to create national benchmarks for care and to report health plan performance to consumers. Health plans might also collect CAHPS survey data for internal quality improvement purposes.
Composite Measures	Composite measures combine results from related survey questions into a single score to summarize health plan performance in a specific area of care or service. The set of applicable composites varies slightly by survey version.
Confidence Level	A confidence level is associated with tests of statistical significance of observed differences in survey scores. It is expressed as a percentage and represents how often the observed difference (e.g., between the plan's current-year rate and the relevant benchmark rate) is real and not simply due to chance. A 95% confidence level associated with a statistical test means that if repeated samples were surveyed, in 95 out of 100 samples the observed measure score would be truly different from the comparison score.
Correlation	A degree of association between two variables, or attributes, typically measured by the <i>Pearson correlation coefficient</i> . The coefficient value of 1 indicates a strong positive relationship; -1 indicates a strong negative relationship; zero indicates no relationship at all.
Denominator ( <i>n</i> , or Usable Responses)	Number of valid (appropriately answered) responses available to calculate a measure result. Examples of inappropriately answered questions include ambiguously marked answers, multiple marks when a single answer choice is expected, and responses that violate survey skip patterns. The denominator for an individual question is the total number of valid responses to that question. The denominator for a composite is the average number of responses across all questions in the composite. If the denominator is less than the NCQA-required minimum of 100 responses, NCQA assigns a measure result of "NA".
Disposition	The final status given to a member record in the survey sample at the end of the study (e.g., completed survey, refusal, non-response, etc.)

## Eligible Population

Members who are eligible to participate in the survey based on the following NCQA criteria:

- Current enrollment (as of the date the sample frame is generated). Some members may no longer be enrolled by the time they complete the survey. They become ineligible and will be excluded from survey results based on their responses to the first two questions on the survey, which confirm membership.
- Continuous enrollment (twelve months for Commercial and six months for Medicaid, with no more than one enrollment break of 45 days or less);
- Member age (18 years old or older for the Adult survey and 17 years old or younger for the Child survey as of December 31 of the measurement year);
- Primary coverage (through Medicaid or a commercial product line for Medicaid and Commercial surveys, respectively).

## Global proportions

Applies to composite measures. The proportion of respondents selecting the favorable response(s) (e.g., *Usually or Always*) averaged across the questions that make up the composite.

## Health Plan Ratings

NCQA rates health plans in three categories: private/commercial plans in which people enroll through work or on their own; plans that serve Medicare beneficiaries in the Medicare Advantage program (not supplemental plans); and plans that serve Medicaid beneficiaries. NCQA ratings are based on three types of quality measures: measures of clinical quality from NCQA's Healthcare Effectiveness Data and Information Set (HEDIS); measures of patient experience using the Consumer Assessment of Healthcare Providers and Systems (CAHPS); and results from NCQA's review of a health plan's health quality processes (NCQA Accreditation). NCQA rates health plans that choose to report measures publicly.

The overall rating is the weighted average of a plan's HEDIS and CAHPS measure ratings, plus Accreditation bonus points (if the plan is Accredited by NCQA), rounded to the nearest half point displayed as stars. The overall rating is based on performance on dozens of measures of care and is calculated on a 0–5 (5 is highest) scale in half points. Performance includes three subcategories (also scored 0–5 in half points):

- Patient Experience: Patient-reported experience of care, including experience with doctors, services and customer service (measures in the Patient Experience category).
- Rates for Clinical Measures: The proportion of eligible members who received preventive services (prevention measures) and the proportion of eligible members who received recommended care for certain conditions (treatment measures).
- NCQA Health Plan Accreditation: For a plan with an Accredited or Provisional status, 0.5 bonus points are added to the overall rating before rounded to the nearest half point and displayed as stars. A plan with an Interim status receives 0.15 bonus points added to the overall rating before rounded to the nearest half point and displayed as stars.

## HEDIS

The Healthcare Effectiveness Data and Information Set (HEDIS) is a set of performance measures in the managed care industry, developed and maintained by NCQA. HEDIS was designed to allow consumers to compare health plan performance to other plans and to national or regional benchmarks as well as to track year-to-year performance. HEDIS is one component of NCQA's accreditation process, although some plans submit HEDIS data without seeking accreditation. CAHPS measures are a subset of HEDIS.

Key Drivers	Key Drivers are plan attributes that have been shown to be closely related to members’ overall assessment of the plan. Performance on these attributes predicts how the plan is rated overall and, viewed from the industry perspective, helps to distinguish high-rated plans from poorly performing plans.
NCQA	The National Committee for Quality Assurance (NCQA) is an independent non-profit organization that works to improve health care quality through the administration of evidence-based standards, measures, programs, and accreditation. NCQA manages voluntary accreditation programs for individual physicians, health plans, and medical groups. Health plans seek accreditation and measure performance through the administration and submission of the Healthcare Effectiveness Data and Information Set (HEDIS) and Consumer Assessment of Healthcare Providers and Systems (CAHPS) survey.
Oversampling	Sampling more than the minimum NCQA-specified sample size for a given survey type. A health plan must oversample if it cannot eliminate disenrolled members from membership files; correct addresses and, when appropriate, telephone numbers; provide updated, accurate sample frames to the survey vendor by the required date; or if it anticipates a high rate of disenrollment after providing the sample frame to the survey vendor. In such cases, oversampling will help ensure that a sufficient number of survey-eligible members remain in the sample. Another reason to oversample is to obtain a greater number of completed surveys. For example, the health plan may oversample if it has a prior history of low survey response rates or if it anticipates that a considerable number of the telephone numbers in the membership files are inaccurate. Collecting more completed surveys will help the plan to achieve reportable results and/or detect statistically significant differences or changes in scores. The oversampling rate must be a whole number (e.g., 7 percent).
Question Summary Rate	Question Summary Rates express the proportion of respondents selecting the response option(s) of interest (typically representing the most favorable outcome(s) from a given question on the survey). Many survey items use a <i>Never, Sometimes, Usually, or Always</i> response scale, with <i>Always</i> being the most favorable outcome. Results are typically reported as the proportion of members selecting <i>Usually</i> or <i>Always</i> .
Response Rate	<p>Survey response rate is calculated by NCQA using the following formula:</p> $\text{Response Rate} = \frac{\text{Complete and Eligible Surveys}}{[\text{Complete and Eligible} + \text{Incomplete (but Eligible)} + \text{Refusal} + \text{Nonresponse after maximum attempts} + \text{Added to Do Not Call (DNC) List}]}$
Rolling Average Rate Calculation Method	The rolling averages method was introduced by NCQA to accommodate measures with small denominators. To report the results of these measures, there must be at least 100 responses collected over two years of survey administration. The numerators and the denominators of these measures are combined over a two-year period to calculate the final reported rate.
Sample size	The NCQA-required sample size is 1,100 for Adult Commercial plans, 1,350 for Adult Medicaid plans, and 1,650 for Child Medicaid plans.

Statistically Significant Difference	When survey results are calculated based on sample data and compared to a benchmark score (e.g., the NCQA National Average rate, the CSS Book-of-Business average, or the plan's own prior-year rate), the question is whether the observed difference is real or due to chance. A difference is said to be statistically significant at a given confidence level (e.g., 95%) if it has a 95% chance of being true.
Trending	Comparison of survey results over time
Usable Responses ( <i>n</i> )	See <i>Denominator</i>
Valid Response	Any acceptable response to a survey question (i.e., falling within a predefined set) that follows the NCQA skip pattern rules and data cleaning guidelines.

## APPENDIX B. SURVEY RESULTS AT A GLANCE

# 2021 (MY2020) CAHPS® 5.1H Survey Results at a Glance

## Aetna Better Health of Louisiana (Child Medicaid with CCC Measure Survey)

Survey Measures	Your Organization						Benchmark Comparisons				Your Organization's Estimated 2021 NCQA Health Plan (Star) Rating
	2021		2020		2019		2021 CSS Child Medicaid Average		2020 NCQA Quality Compass National Average (All LOBs)		
	Rate	(n)	Rate	Point Change	Rate	Point Change	Rate	Point Diff.	Rate	Point Diff.	
<b>Patient Experience Measures Reported in NCQA Health Plan Ratings (General Population)</b>											★★★★☆
<b>Getting Care</b>											★★★★☆
<b>Getting Needed Care Composite (% Always or Usually)</b>	87.23%	(151)	84.87%	[+2.37]	89.16%	[-1.92]	85.00%	[+2.23]	86.03%	[+1.20]	★★★★☆

### Calculation and Reporting of Results

All rates were calculated by CSS following NCQA specifications. The number of valid responses collected this year for each measure (n, or measure denominator) is reported in parentheses.

### Rate Comparisons and Statistical Significance Testing

Comparisons to prior-year and benchmark rates were calculated prior to rounding and rounded for display. Differences in rates were tested for statistical significance using a t-test for proportions at the 95% confidence level. Statistically significant differences between your current-year rate and the comparison rate are marked with a ✓ symbol.

### Health Plan Ratings (HPR)

Estimated HPR stars for applicable measures, calculated by CSS based on the 2020 NCQA Quality Compass national benchmarks, are displayed for reference only. Final HPR stars will be calculated by NCQA based on the 2021 Quality Compass benchmarks. NCQA plans to release these scored directly to plans in September of 2021.

## Question 43

We want to know your rating of the specialist your child talked to most often in the last 6 months. Using any number from 0 to 10, where 0 is the worst specialist possible and 10 is the best specialist possible, what number would you use to rate that specialist?

Base: All respondents whose child saw a specialist (Q40 & Q42)

	2021 CSS Average - Chronic	2021	2020	2019	Type of Chronic Condition						Child's Age			Child's Hispanic Status		Child's Race			Child's Health Status			Child's Doctor Visits in Last 6 Months

How can Aetna Better Health® of Louisiana serve your family better? How can people choose the health care plan that is best for them?

This survey gives you the chance to tell us what you think about the services we provide to your child at Aetna Better Health® of Louisiana. It will take less than 20 minutes to complete. The person who knows the most about your child's health care should fill out the survey.

The survey is part of a national project by the National Committee for Quality Assurance (NCQA), a non-profit group that helps people learn more about health care plans.

The Center for the Study of Services (CSS) is an independent research firm that is helping us conduct the survey. No one but the staff at CSS and NCQA will see your answers. Your answers will not have your name on them and will be part of a pool of information from others like you. Please call CSS at the toll-free number 1-800-874-5561 or e-mail them at [questions@cssresearch.org](mailto:questions@cssresearch.org) if you have any questions.

Because we are asking only a few people to take the survey, **it is very important that you fill out the survey and return it right away.** Please use the pre-paid envelope to return the survey.

Thank you for helping to make health care better for all children.

Sincerely,

A handwritten signature in black ink that reads "Richard C. Born". The signature is written in a cursive, flowing style.

Richard C. Born  
VP, Medicaid Health Plan/CEO

AETLA7\_3

About three weeks ago, we sent you a survey about the services we provide to your child at Aetna Better Health® of Louisiana. If you sent your survey back, thank you for your help! You can ignore this letter.

We sent you another survey, just in case you misplaced the first one. Please take a little time to complete it. It will take less than 20 minutes to complete. The person who knows the most about your child's health care should fill out the survey.

The survey is part of a national project by the National Committee for Quality Assurance (NCQA), a non-profit group that helps people learn more about health care plans.

The Center for the Study of Services (CSS) is an independent research firm that is helping us conduct the survey. No one but the staff at CSS and NCQA will see your answers. Your answers will not have your name on them and will be part of a pool of information from others like you. Please call CSS at the toll-free number 1-800-874-5561 or e-mail them at [questions@cssresearch.org](mailto:questions@cssresearch.org) if you have any questions.

Because we asked only a few people to take the survey, **it is very important that you fill out the survey and return it right away.** Please return it in the pre-paid envelope.

Thank you for helping to make health care better for all children.

Sincerely,

A handwritten signature in black ink that reads "Richard C. Born". The signature is written in a cursive, flowing style.

**Si quiere que CSS le envíe un cuestionario en español, por favor llámenos al 1-800-874-5561.**

**We need your help!** Recently, we sent you a short survey about your child's health care. Your answers will help to improve the services we provide to children. The survey will also help other people learn more about health care plans, but it will help only if everyone who gets the survey sends it back.

After you finish the survey, please return it in the pre-paid envelope to the Center for the Study of Services (CSS), a research firm working with us on this survey.

**If you did not get the survey, or if you misplaced it,** call CSS at the toll-free number 1-800-874-5561 or e-mail them at [questions@cssresearch.org](mailto:questions@cssresearch.org). They will mail you another one. You can also call that number if you have any questions.

If you have already sent in your survey, thank you! You can ignore this reminder.

Thanks again for your help!

## SURVEY INSTRUCTIONS

Answer each question by marking the box to the left of your answer.

You are sometimes told to skip over some questions in this survey. When this happens you will see an arrow with a note that tells you what question to answer next, like this:

- <sub>1</sub> Yes → *If Yes, Go to Question 1*  
<sub>2</sub> No

Personally identifiable information will not be made public and will only be released in accordance with federal laws and regulations.

You may choose to answer this survey or not. If you choose not to, this will not affect the benefits your child receives. You may notice a number on the cover of this survey. This number is **ONLY** used to let us know if you returned your survey so we don't have to send you reminders.

If you want to know more about this study, please call 1-800-874-5561.

Please answer the questions for the child listed on the envelope. Please do not answer for any other children.

1. Our records show that your child is now in Aetna Better Health® of Louisiana. Is that right?
- <sub>1</sub> Yes → *If Yes, Go to Question 3*  
<sub>2</sub> No
2. What is the name of your child's health plan?  
*(Please print)*
- \_\_\_\_\_

## YOUR CHILD'S HEALTH CARE IN THE LAST 6 MONTHS

These questions ask about your child's health care from a clinic, emergency room, or doctor's office. This includes care your child got in person, by phone, or by video. Do **not** include care your child got when he or she stayed overnight in a hospital. Do **not** include the times your child went for dental care visits.

3. In the last 6 months, did your child have an illness, injury, or condition that needed care right away?
- <sub>1</sub> Yes  
<sub>2</sub> No → *If No, Go to Question 5*

4. In the last 6 months, when your child needed care right away, how often did your child get care as soon as he or she needed?
- Never      Sometimes      Usually      Always  
<sub>1</sub>                      <sub>2</sub>                      <sub>3</sub>                      <sub>4</sub>
5. In the last 6 months, did you make any in person, phone, or video appointments for a check-up or routine care for your child?
- <sub>1</sub> Yes  
<sub>2</sub> No → *If No, Go to Question 7*
6. In the last 6 months, how often did you get an appointment for a check-up or routine care for your child as soon as your child needed?
- Never      Sometimes      Usually      Always  
<sub>1</sub>                      <sub>2</sub>                      <sub>3</sub>                      <sub>4</sub>
7. In the last 6 months, not counting the times your child went to an emergency room, how many times did he or she get health care in person, by phone, or by video?
- <sub>0</sub> None → *If None, Go to Question 11*  
<sub>1</sub> 1 time  
<sub>2</sub> 2  
<sub>3</sub> 3  
<sub>4</sub> 4  
<sub>5</sub> 5 to 9  
<sub>6</sub> 10 or more times

8. In the last 6 months, how often did you have your questions answered by your child's doctors or other health providers?

Never <sub>1</sub>      Sometimes <sub>2</sub>      Usually <sub>3</sub>      Always <sub>4</sub>

9. Using any number from 0 to 10, where 0 is the worst health care possible and 10 is the best health care possible, what number would you use to rate all your child's health care in the last 6 months?

0   1   2   3   4   5   6   7   8   9   10  
            
Worst health care possible      Best health care possible

10. In the last 6 months, how often was it easy to get the care, tests, or treatment your child needed?

Never <sub>1</sub>      Sometimes <sub>2</sub>      Usually <sub>3</sub>      Always <sub>4</sub>

11. Is your child now enrolled in any kind of school or daycare?

<sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 14**

12. In the last 6 months, did you need your child's doctors or other health providers to contact a school or daycare center about your child's health or health care?

<sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 14**

13. In the last 6 months, did you get the help you needed from your child's doctors or other health providers in contacting your child's school or daycare?

<sub>1</sub> Yes  
<sub>2</sub> No

## SPECIALIZED SERVICES

14. Special medical equipment or devices include a walker, wheelchair, nebulizer, feeding tubes, or oxygen equipment. In the last 6 months, did you get or try to get any special medical equipment or devices for your child?

<sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 17**

15. In the last 6 months, how often was it easy to get special medical equipment or devices for your child?

Never <sub>1</sub>      Sometimes <sub>2</sub>      Usually <sub>3</sub>      Always <sub>4</sub>

16. Did anyone from your child's health plan, doctor's office, or clinic help you get special medical equipment or devices for your child?

<sub>1</sub> Yes  
<sub>2</sub> No

17. In the last 6 months, did you get or try to get special therapy such as physical, occupational, or speech therapy for your child?

<sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 20**

18. In the last 6 months, how often was it easy to get this therapy for your child?

Never <sub>1</sub>      Sometimes <sub>2</sub>      Usually <sub>3</sub>      Always <sub>4</sub>

19. Did anyone from your child's health plan, doctor's office, or clinic help you get this therapy for your child?

<sub>1</sub> Yes  
<sub>2</sub> No

20. In the last 6 months, did you get or try to get treatment or counseling for your child for an emotional, developmental, or behavioral problem?

<sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 23**

21. In the last 6 months, how often was it easy to get this treatment or counseling for your child?

Never <sub>1</sub>      Sometimes <sub>2</sub>      Usually <sub>3</sub>      Always <sub>4</sub>

22. Did anyone from your child's health plan, doctor's office, or clinic help you get this treatment or counseling for your child?

<sub>1</sub> Yes  
<sub>2</sub> No

23. In the last 6 months, did your child get care from more than one kind of health care provider or use more than one kind of health care service?

<sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 25**

24. In the last 6 months, did anyone from your child's health plan, doctor's office, or clinic help coordinate your child's care among these different providers or services?

- <sub>1</sub> Yes  
<sub>2</sub> No

### YOUR CHILD'S PERSONAL DOCTOR

25. A personal doctor is the one your child would talk to if he or she needs a check-up, has a health problem or gets sick or hurt. Does your child have a personal doctor?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 40**

26. In the last 6 months, how many times did your child have an in person, phone, or video visit with his or her personal doctor?

- <sub>0</sub> None → **If None, Go to Question 36**  
<sub>1</sub> 1 time  
<sub>2</sub> 2  
<sub>3</sub> 3  
<sub>4</sub> 4  
<sub>5</sub> 5 to 9  
<sub>6</sub> 10 or more times

27. In the last 6 months, how often did your child's personal doctor explain things about your child's health in a way that was easy to understand?

- Never Sometimes Usually Always  
<sub>1</sub> <sub>2</sub> <sub>3</sub> <sub>4</sub>

28. In the last 6 months, how often did your child's personal doctor listen carefully to you?

- Never Sometimes Usually Always  
<sub>1</sub> <sub>2</sub> <sub>3</sub> <sub>4</sub>

29. In the last 6 months, how often did your child's personal doctor show respect for what you had to say?

- Never Sometimes Usually Always  
<sub>1</sub> <sub>2</sub> <sub>3</sub> <sub>4</sub>

30. Is your child able to talk with doctors about his or her health care?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 32**

31. In the last 6 months, how often did your child's personal doctor explain things in a way that was easy for your child to understand?

- Never Sometimes Usually Always  
<sub>1</sub> <sub>2</sub> <sub>3</sub> <sub>4</sub>

32. In the last 6 months, how often did your child's personal doctor spend enough time with your child?

- Never Sometimes Usually Always  
<sub>1</sub> <sub>2</sub> <sub>3</sub> <sub>4</sub>

33. In the last 6 months, did your child's personal doctor talk with you about how your child is feeling, growing, or behaving?

- <sub>1</sub> Yes  
<sub>2</sub> No

34. In the last 6 months, did your child get care from a doctor or other health provider besides his or her personal doctor?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 36**

35. In the last 6 months, how often did your child's personal doctor seem informed and up-to-date about the care your child got from these doctors or other health providers?

- Never Sometimes Usually Always  
<sub>1</sub> <sub>2</sub> <sub>3</sub> <sub>4</sub>

36. Using any number from 0 to 10, where 0 is the worst personal doctor possible and 10 is the best personal doctor possible, what number would you use to rate your child's personal doctor?

- 0 1 2 3 4 5 6 7 8 9 10  
            
Worst personal doctor possible Best personal doctor possible

37. Does your child have any medical, behavioral, or other health conditions that have lasted for more than 3 months?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 40**

38. Does your child's personal doctor understand how these medical, behavioral, or other health conditions affect your child's day-to-day life?

- <sub>1</sub> Yes  
<sub>2</sub> No

51. In the last 6 months, how often was it easy to get prescription medicines for your child through his or her health plan?

- Never <sub>1</sub>      Sometimes <sub>2</sub>      Usually <sub>3</sub>      Always <sub>4</sub>

52. Did anyone from your child's health plan, doctor's office, or clinic help you get your child's prescription medicines?

- <sub>1</sub> Yes  
<sub>2</sub> No

## ABOUT YOUR CHILD AND YOU

53. In general, how would you rate your child's overall health?

- <sub>1</sub> Excellent  
<sub>2</sub> Very good  
<sub>3</sub> Good  
<sub>4</sub> Fair  
<sub>5</sub> Poor

54. In general, how would you rate your child's overall mental or emotional health?

- <sub>1</sub> Excellent  
<sub>2</sub> Very good  
<sub>3</sub> Good  
<sub>4</sub> Fair  
<sub>5</sub> Poor

55. Does your child currently need or use medicine prescribed by a doctor (other than vitamins)?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 58**

56. Is this because of any medical, behavioral, or other health condition?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 58**

57. Is this a condition that has lasted or is expected to last for at least 12 months?

- <sub>1</sub> Yes  
<sub>2</sub> No

58. Does your child need or use more medical care, more mental health services, or more educational services than is usual for most children of the same age?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 61**

59. Is this because of any medical, behavioral, or other health condition?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 61**

60. Is this a condition that has lasted or is expected to last for at least 12 months?

- <sub>1</sub> Yes  
<sub>2</sub> No

61. Is your child limited or prevented in any way in his or her ability to do the things most children of the same age can do?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 64**

62. Is this because of any medical, behavioral, or other health condition?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 64**

63. Is this a condition that has lasted or is expected to last for at least 12 months?

- <sub>1</sub> Yes  
<sub>2</sub> No

64. Does your child need or get special therapy such as physical, occupational, or speech therapy?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 67**

65. Is this because of any medical, behavioral, or other health condition?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 67**

66. Is this a condition that has lasted or is expected to last for at least 12 months?

- <sub>1</sub> Yes  
<sub>2</sub> No

67. Does your child have any kind of emotional, developmental, or behavioral problem for which he or she needs or gets treatment or counseling?

- <sub>1</sub> Yes  
<sub>2</sub> No → **If No, Go to Question 69**

68. Has this problem lasted or is it expected to last for at least 12 months?

- <sub>1</sub> Yes  
<sub>2</sub> No

69. What is your child's age?

- <sub>00</sub> Less than 1 year old  
\_\_\_\_\_ YEARS OLD (*write in*)

70. Is your child male or female?

- <sub>1</sub> Male  
<sub>2</sub> Female

71. Is your child of Hispanic or Latino origin or descent?
