CHANGE IN CARDIAC CODES PRIOR AUTHORIZATION REQUIREMENTS

Effective November 1, 2023, there are two Cardiac codes that will have a change in their prior auth requirements for par providers. The updates are part of a larger optimization initiative intended to improve operational efficiency and reduce unnecessary provider administration efforts.

Codes No Longer Requiring Prior Auth

| Code | Description |
|-------------|---|
| 93462 | Left heart catheterization by transseptal puncture through intact septum or by transapical puncture (List separately in addition to code for primary procedure) |
| 93352 | Use of echocardiographic contrast agent during stress echocardiography (List separately in addition to code for primary procedure) |

Questions?

If you have any questions, please contact our Prior Authorization Department at 1-866-638-1232 or, contact your Provider Relations Representative.

Sincerely,

Provider Relations Department
